Independent Auditors' Report

The Board of Trustees Emory University Atlanta, Georgia

We have audited the accompanying consolidated financial statements of Emory University and its subsidiaries (the University), which comprise the consolidated statements of financial position as of August 31, 2018 and 2017, and the related consolidated statements of activities and cash flows for the years then ended, and the related notes to the consolidated financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Emory University and its subsidiaries as of August 31, 2018 and 2017, and the changes in their net assets and their cash flows for the years then ended, in accordance with U.S. generally accepted accounting principles.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated January 31, 2019 on our consideration of the University's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the University's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the University's internal control over financial reporting and compliance.

Atlanta, Georgia January 31, 2019

Notes to Consolidated Financial Statements
August 31, 2018 and 2017

(1) Organization

Emory University (the University or Emory) is a private, coeducational, not-for-profit institution, located in Atlanta, Georgia. Founded in 1836, Emory owns and operates educational, research, and healthcare facilities to support its mission. Emory provides educational services to approximately 8,100 undergraduate students and 7,400 graduate and professional students within its nine schools and colleges. Included within the University is the Emory Healthcare system, Emory Medical Care Foundation (EMCF) and Emory Innovations, LLC.

The Emory Healthcare system (Emory Healthcare) consists of Emory Healthcare, Inc. (EHC) and its controlled operating companies, including Emory University Hospital Midtown (EUHM), Emory University Hospital (EUH), Emory Saint Joseph's Hospital (ESJH), EHCA Johns Creek Hospital, LLC (EJCH), Emory Rehabilitation Hospital (ERH), The Emory Clinic, Inc. (TEC), Emory Specialty Associates, LLC (ESA), Emory Specialty Associates – Joint Operating Company (ESA JOC), Wesley Woods Center of Emory University, Inc. (WWC), and Clifton Casualty Insurance Company, Ltd. (CCIC). EUH, EUHM, EJCH, and ESJH are sometimes referred to herein, collectively, as "the Hospitals."

The consolidated financial statements include the University and all other entities in which Emory has significant financial interest and control. All significant inter-entity accounts and transactions have been eliminated in consolidation.

(2) Summary of Significant Accounting Policies

The following significant accounting policies are used in the preparation of the accompanying consolidated financial statements:

The consolidated financial statements have been prepared on the accrual basis in conformity with U.S. generally accepted accounting principles (GAAP).

Net assets and revenues, gains, and losses are classified based on the existence or absence of externally imposed restrictions. Accordingly, net assets of the University are classified and reported as follows:

Unrestricted Net Assets – Net assets that are not subject to donor-imposed stipulations; certain unrestricted net assets are designated for specific purposes or uses under various internal operating and administrative arrangements of the University.

Temporarily Restricted Net Assets – Net assets that are subject to donor-imposed stipulations; that will be met either by actions of the University and/or the passage of time

Permanently Restricted Net Assets – Net assets that are subject to donor-imposed restrictions that the University maintains permanently (note 7); generally, the donors of these assets permit the University to use all or part of the income earned and net appreciation on related investments for general or specific purposes.

Revenues are reported as increases in unrestricted net assets unless their use is limited by donor-imposed restrictions. Expenses are reported as decreases in unrestricted net assets. Gains and losses on investments and other assets or liabilities are reported as increases or decreases in unrestricted net assets unless their use is restricted by explicit donor stipulation or by law. Expirations of restrictions on net assets (i.e., the

Notes to Consolidated Financial Statements August 31, 2018 and 2017

donor-stipulated purpose has been fulfilled and/or the stipulated time period has elapsed) are reported as net assets released from restrictions and shown as reclassifications among the applicable classes of net assets.

Income and realized and unrealized gains on investments of permanently donor-restricted endowment net assets are reported as follows:

- As increases in permanently restricted net assets if the terms of the gift require that they be added to the principal of a permanent endowment fund
- As increases in temporarily restricted net assets until appropriated for expenditure by the University and/or donor restrictions are met

Revenues earned, expenses incurred, and investment returns made available for the University's operating purposes of teaching, research, patient care, and other programs and services are components of the net operating revenues/expenses presented in the consolidated statements of activities. The University considers the following items to be nonoperating: gifts and contributions for capital and long-term investment and the related net assets released from restrictions, investment return in excess of spending distribution for current operations, change in fair value of derivative instruments, pension and postretirement related changes other than net periodic cost, and other, net.

(a) Cash Equivalents

Cash equivalents consist primarily of bank balances and short-term money market mutual funds and treasury bills with original maturities of 90 days or less that are not invested as part of the long-term investment assets. These amounts are carried at cost, which approximates fair value. Cash and cash equivalents that are part of the long-term pool are shown within investments as those funds generally are not used for daily operating purposes.

(b) Contributions Receivable

Contributions of assets other than cash are recorded at their estimated fair value at the date of the gift. Contributions to be received after one year, net of an allowance for uncollectible amounts are discounted to their present value at credit-adjusted rates. Amortization of discounts is recorded as additional contribution revenue. An allowance for uncollectible contributions receivable is provided based on management's judgment, considering such factors as prior collection history, type of contribution, relationship with donor, and other relevant factors.

(c) Loans Receivable, Net

Emory-funded loans to students are carried at estimated net realizable value. Loans receivable from students under certain governmental loan programs, carried at cost, can only be assigned to the federal government or its designees. In addition to Federal Direct Loans (which are not reported in the consolidated financial statements), loans to qualified students are funded principally with government advances to Emory under the Perkins, Nursing, and Health Professions Student Loan Programs.

Notes to Consolidated Financial Statements
August 31, 2018 and 2017

(d) Other Receivables, Net

Other receivables are recorded at net realizable value and include receivables under grants and contracts, medical services provided to other organizations, and losses recoverable from reinsurers.

(e) Investments

Investments in securities include U.S. and non-U.S. equities and fixed-income instruments, both publicly traded and privately held. Fair value for these investments is measured based on quoted prices in active markets, if available. If the market is inactive, fair value is determined by underlying managers and reviewed by the University after considering various sources of information. Due to variations in trading volumes and the lack of quoted market prices for fixed income, the fair value of fixed income is normally derived through recent reported trades for identical or similar securities, making adjustments through the reporting date based on available market observable data.

Investments in funds primarily include investments in commingled equity and fixed-income funds and other investments in funds (public market investments, private market investments, real estate partnerships, and natural resources) and are reported at fair value, as determined by the University in accordance with the University's valuation policies and procedures. The University has estimated the fair value of the majority of its investments in investment funds on the basis of the net asset value (NAV) per share of the investment (or its equivalent), as a practical expedient, if a) the underlying investment manager's calculation of NAV is fair value based, b) the NAV has been calculated by the fund manager or fund administrator as of the University's fiscal year-end date, and c) the University does not currently have plans to sell the investment for an amount different from NAV. If the reported NAV is not as of the University's fiscal year-end date or is not fair value based, the University will adjust the NAV, if deemed necessary. If the University determines it is not practicable to calculate an adjusted NAV as of the University's fiscal year-end date, the practical expedient will not be utilized and other valuation methodologies will be used. Typically, real estate partnerships and similar funds are valued based on appraisals of underlying properties held and conducted by third-party appraisers retained by the general partner or investment manager. General partners of oil and gas partnerships also use third-party appraisers to value properties. Valuations provided by the general partners and investment managers are evaluated by the Emory Investment Management Office and are believed to present reasonable estimates of fair value at August 31, 2018 and 2017.

The University's investments in investment funds are subject to the terms of the respective funds' agreements, private placement memoranda, and other governing agreements of such funds. These terms are typical for hedge fund and private equity arrangements. The University's investments are also subject to management and performance fees as specified in such funds' agreements. Additionally, such funds in which the University invests may restrict both the transferability of the University's interest and the University's ability to withdraw. In light of such restrictions imposed, an investment in these funds is illiquid and subject to liquidity risk.

Investment transactions are accounted for on the trade-date basis. Dividend income is recognized on the ex-dividend date, and interest income is recognized on the accrual basis. Realized gains and losses are determined by the specific identification method for investments in investment funds and average cost for investments in securities. Additionally, gains and losses from realized and unrealized changes in the fair value of investments are reported in the consolidated statements of activities as increases or

Notes to Consolidated Financial Statements
August 31, 2018 and 2017

decreases in unrestricted net assets, if there are no donor restrictions, or in temporarily restricted net assets, until amounts have been appropriated and the donor-imposed time restrictions have elapsed. Changes in the fair value of these instruments are recognized as nonoperating investment gains or losses in the consolidated statements of activities.

(f) Fair Value Measurements

Fair value measurements reflected in the consolidated financial statements conceptually represent the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction among market participants at the measurement date. GAAP provides a hierarchy that prioritizes the inputs to fair value measurements based on the extent to which inputs to valuation techniques are observable in the marketplace. The hierarchy assigns a higher priority to observable inputs that reflect verifiable information obtained from independent sources and a lower priority to unobservable inputs that would reflect the University's assumptions about how market participants would value an asset or liability based on the best information available. Fair value measurements must maximize the use of observable inputs and minimize the use of unobservable inputs.

Assets and liabilities measured and reported at fair value are classified and disclosed within one of the following categories:

Level 1 – Valuations for assets and liabilities traded in active exchange markets as of the reporting date; valuations are obtained from readily available pricing sources for market transactions involving identical assets or liabilities.

Level 2 – Valuations are determined through direct or indirect observations other than quoted market prices. The type of investments in Level 2 also includes certain positions in which the University is a unit of account holder within a fund or account that holds underlying assets that are traded in active exchange markets with readily available pricing.

Level 3 – Valuations for assets and liabilities that are unobservable and derived from other valuation methodologies, including discounted cash flow models and similar techniques, and not based on market exchange, dealer, or broker-traded transactions; Level 3 valuations incorporate certain assumptions and projections in determining the fair value assigned to such assets or liabilities.

The majority of the University's investments are held through limited partnerships and commingled funds, for which fair value is estimated using the NAVs reported by the investment managers as a practical expedient. Such investments have not been categorized within the fair value hierarchy. Although a secondary market exists for these investments, the market is not active and individual transactions are typically not observable. When transactions do occur in this limited secondary market, they may occur at discounts to the reported NAV. It is therefore reasonably possible that if the University were to sell these investments in the secondary market, a buyer may require a discount to the reported NAV, and that discount could be significant.

(g) Split-Interest Agreements

The University's split-interest agreements with donors consist primarily of gift annuity agreements and irrevocable charitable remainder trusts for which the University serves as trustee. Assets held in

Notes to Consolidated Financial Statements
August 31, 2018 and 2017

the trusts are included in investments. Contribution revenues are recognized when trusts (or annuity agreements) are established, after recording liabilities for the present value of the estimated future payments to be made to beneficiaries. The liabilities are adjusted annually for changes in the value of assets, accretion of the discount, and other changes in the estimates of future benefits.

(h) Interests in Perpetual Funds Held by Others

The University is also the beneficiary of certain perpetual funds held and administered by others. The value of the funds' assets (or Emory's share when there are other beneficiaries) is considered a reasonable estimate of the present value of the estimated future cash flows from these funds and is recognized in beneficial interest in perpetual funds and as contribution revenue at the date such funds are established. The largest fund of this type consists primarily of shares of common stock of The Coca-Cola Company. The carrying value of Emory's interest is adjusted annually for changes in fair value.

(i) Property and Equipment, net

Land, buildings, and equipment are recorded at cost at the date of acquisition or fair value at the date of gift to the University. Depreciation expense is based on the straight-line method over the estimated useful lives of the assets. Useful lives are as follows: buildings – 10 to 60 years, land improvements and infrastructure – 5 to 40 years, movable equipment – 3 to 20 years, fixed equipment – 3 to 30 years, software and enterprise systems – 3 to 10 years, leasehold improvements – term of the lease, and library books – 10 years. Certain assets totaling \$107.1 million and \$99.0 million, such as art, museum assets, and rare books, are included in property and equipment on August 31, 2018 and 2017, respectively, but are not depreciated.

(i) Net Tuition and Fees

Tuition and fees revenues are recognized in the period in which the academic services are rendered. Student tuition and fee receipts received in advance of services are reported as deferred revenue. Student financial aid provided by the University for tuition and fees is reflected as a reduction of gross tuition and fees.

(k) Gifts and Contributions Revenue

Contributions, including unconditional promises to give, are recognized as revenues in the period received. Unconditional promises to give, with payments due in future periods, are recorded as increases in temporarily or permanently restricted assets at the estimated present value of future cash flows, net of an allowance for uncollectible pledges.

Donor-restricted contributions are reported as temporarily restricted or permanently restricted revenue that increases those net asset classes. Expirations of temporary restrictions on net assets, such as the donor stipulation being met or the passage of time, are reported as net assets released from restrictions and reflect reclassifications from temporarily restricted net assets to unrestricted net assets. If the donor stipulation for a temporarily restricted contribution is met in the year of the gift, the contribution is reflected in the unrestricted net asset class. Temporary restrictions on gifts to acquire long-lived assets are considered met in the period when the asset is placed in service. Conditional promises to give are

Notes to Consolidated Financial Statements
August 31, 2018 and 2017

not recognized until they become unconditional; that is, when the conditions on which they depend are met.

(1) Grants and Contracts Revenue and Indirect Cost Recoveries

Funding from a federal agency, corporation, or private foundation (sponsor) is recorded as grants and contracts revenue when it is for a specified activity with a defined budget, period of performance, and scope of work undertaken by the University. The agreement with the sponsor may take the form of a contract, grant, or cooperative agreement and is generally in direct support of the University's mission. Sponsored program revenues and program income are earned when the University has substantially met its obligations and when the contractual performance measures have been completed. Revenue is recognized when services are rendered, or allowable expenditures are incurred as specified in the terms and conditions of the agreements, not necessarily when payments are received. Unearned revenue results when cash is received from sponsors in advance of revenue being earned. Unearned revenue is recorded as a liability (deferred revenue) until it is earned. Amounts recorded in grants and contracts receivable are for services rendered or expenditures incurred in advance of the receipt of funds.

Indirect cost recoveries are based on negotiated rates with grantor agencies and represent recoveries of facilities and administrative costs incurred under grants and contracts agreements.

(m) Net Patient Service Revenue

Net patient service revenue is reported at the estimated net realizable amounts due from patients, third-party payors, and others for services rendered, including estimated retroactive adjustments due to future audits, reviews, and investigations. Retroactive adjustments are considered in the recognition of revenue on an estimated basis in the period the related services are rendered, and such amounts are adjusted in future periods as adjustments become known or as years are no longer subject to such audits, reviews, and investigations. Emory Healthcare's estimates in this area may differ from actual experience, and those differences may be material.

The Hospitals reserve for third-party payor cost report audits and anticipated settlements, through initial audit and final settlement of the cost reports. The Hospitals' maintain estimates of third-party settlements for the Hospitals' routine exposures in this area in recognition of the complexity of relevant reimbursement regulations and the volatility of related settlement processes.

Notes to Consolidated Financial Statements
August 31, 2018 and 2017

(n) Sales and Services of Auxiliary Enterprises and Independent Operations

An auxiliary enterprise, as put forth by the National Association of College and University Business Officers, is a nonacademic entity that exists predominantly to furnish goods and services to students, faculty, and staff. Auxiliary enterprises include residential halls, food services, a bookstore, and parking operations. Fee charges are directly related to the costs of services provided.

Independent operations are activities, which are solely owned and/or controlled by the University but are unrelated or independent of its mission. Independent operations include an externally managed conference center, hotel, and a fitness center. Fee charges are based on market rates for the services provided.

(o) Income Taxes

The University is recognized as a tax-exempt organization as defined in Section 501(c)(3) of the U.S. Internal Revenue Code (the Code) and is generally exempt from the federal income taxes on related income pursuant to Section 501(a) of the Code. Accordingly, no provision for income taxes is made in the consolidated financial statements. Unrelated business income of the University is reported on Form 990-T. In December 2017, the Tax Cuts and Job Acts (the Act) was approved by the United States Congress. Emory is currently evaluating the impact of the Act.

(p) Derivative Instruments

Certain investment strategies used by the University and its investment managers incorporate various derivative financial instruments in order to reduce volatility, manage market risk, and enhance investment returns. Such instruments are reflected at fair value and included in investments. Changes in fair value of these instruments are recognized as nonoperating investment gains or losses in the consolidated statements of activities. The University will, from time to time, utilize interest swap agreements to hedge interest rate market exposure of variable rate debt. The difference between amounts paid and received under such agreements is reported in interest expense. Changes in the fair value of these swap agreements are recognized as nonoperating changes in net assets in the consolidated statements of activities.

(q) Pension and Postretirement Benefit Plans

The University recognizes the funded status of its defined-benefit pension and postretirement benefit plans as an asset or liability and recognizes changes in funded status during the year in which the changes occur as changes in unrestricted net assets.

(r) Reclassifications

Certain amounts included in the accompanying 2017 consolidated statements of financial position have been reclassified to conform with the 2018 presentation.

The University reduced both the purchases and sales of investments, within the investing activities of the consolidated statement of cash flows in 2017, which reflects the netting of high volume cash activities within its investment pools.

Notes to Consolidated Financial Statements
August 31, 2018 and 2017

(s) New Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-09, *Revenue from Contracts with Customers*, which requires entities to recognize revenue to depict the transfer of promised goods or services to customers in amounts that reflect the consideration expected in exchange for those goods or services. Entities should also disclose quantitative and qualitative information about the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers. ASU No. 2014-09 is effective for the University for FY 2019.

In June 2018, the FASB issued ASU No. 2018-08, Clarifying the Scope and Accounting Guidance for Contributions Received and Contributions Made, which clarifies whether grant (or similar transactions) should be accounted for as contributions or exchange transactions. ASU No. 2018-08 is effective in FY 2019 for the University.

In August 2016, the FASB issued ASU No. 2016-14, *Presentation of Financial Statements of Non-for-Profit Entities*. ASU No. 2016-14 (1) reduces the number of net asset classes presented from three to two, (2) requires the presentation of expenses by functional and natural classification in one location, and (3) requires quantitative and qualitative disclosures about liquidity and availability of financial assets. ASU No. 2016-14 is effective in FY 2019 for the University.

In March 2017, the FASB issued ASU No. 2017-07, *Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost*, which requires the University to present the service cost component of net benefit cost within operating expenses and all other components of net benefit cost in nonoperating activities. The ASU is effective for the University in FY 2020.

In February 2016, the FASB issued ASU No. 2016-02, *Leases (Topic 842)*. ASU No. 2016-02 requires the recognition of right-of-use assets and lease liabilities by lessees for those leases classified as operating leases under the Accounting Standards Codification (ASC) Topic 840 – Leases. The accounting applied by a lessor under ASU No. 2016-02 is largely unchanged from that applied under ASC Topic 840. ASU No. 2016-02 is effective for the University in FY 2020.

(t) Use of Estimates

The preparation of the consolidated financial statements in conformity with GAAP requires that management make estimates and assumptions affecting the reported amounts of assets, liabilities, revenues, and expenses, as well as disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Significant items in the University's consolidated financial statements subject to such estimates and assumptions include valuations for certain investments without readily determinable fair values, the determination of the allowances for uncollectible accounts and contractual adjustments, reserves for employee healthcare and workers' compensation claims, accrued professional and general liability costs, estimated third-party settlements, and actuarially determined benefit liabilities.

Notes to Consolidated Financial Statements
August 31, 2018 and 2017

(u) Conflict of Interest Policies

University trustees, directors, principal officers, and key employees may periodically be directly or indirectly associated with companies doing business with the University. The University requires annual disclosure of significant financial interests in, or employment or board service with, entities doing business with the University. The annual disclosures cover these key officials and their immediate family members. When such relationships exist, measures are taken to appropriately manage the actual or perceived conflict. The written conflict of interest policy for the University requires, among other things, that no member of a governing board may participate in any decision in which he or she (or an immediate family member) has a material financial interest.

(3) Contributions Receivable

Contributions receivable as of August 31 consist of the following (in thousands):

	2018	2017
Unconditional promises expected to be collected in:		
Less than one year	\$ 167,912	35,953
One year to five years	275,094	52,171
Over five years	 2,983	3,671
Gross contributions receivable	445,989	91,795
Less:		
Allowance for uncollectible amounts	(10,581)	(2,516)
Discount to present value	 (39,281)	(8,872)
Contributions receivable, net	\$ 396,127	80,407

At August 31, 2018 and 2017, the five largest outstanding donor pledge balances represented 90% and 42%, respectively, of Emory's gross contributions receivable. Contributions receivable are discounted at rates ranging from 1.83% to 9.24%.

As of August 31, 2018, the University had received bequest intentions and conditional promises of approximately \$27.0 million. These intentions to give are not recognized as assets or revenues and, if received, will generally be restricted for purposes stipulated by the donor.

(4) Business and Credit Concentrations

Emory Healthcare grants credit to patients, substantially all of whom reside in the service areas. Emory Healthcare generally does not require collateral or other security in extending credit to patients; however, it routinely obtains assignment of (or is otherwise entitled to receive) patients' benefits payable under their health insurance programs, plans, or policies (e.g., Medicare, Medicaid, Managed Care, capitated, and other

Notes to Consolidated Financial Statements August 31, 2018 and 2017

preferred provider arrangements and commercial insurance policies). The composition of net receivables from patients and third-party payors follows:

	2018	2017
Managed care and other third-party payors	56%	54%
Medicare	32	38
Patients	5	4
Medicaid	7	4
	100%	100%

(5) Net Patient Service Revenue

Emory Healthcare has agreements with governmental and other third-party payors that provide for reimbursement to Emory Healthcare at amounts different from established rates. Contractual adjustments under third-party reimbursement programs represent the difference between Emory Healthcare's billings at established rates for services and amounts reimbursed by third-party payors. A summary of the basis of reimbursement with major third-party payors follows:

- Medicare Substantially all acute care and professional services rendered to Medicare program beneficiaries are paid at prospectively determined rates. These rates vary according to patient classification systems that are based on clinical, diagnostic, and other factors. Revenue from the Medicare program accounted for approximately 40% and 41% of Emory Healthcare's net patient service revenue for the years ended August 31, 2018 and 2017, respectively.
- Medicaid Inpatient and professional services rendered to Medicaid program beneficiaries are paid at
 prospectively determined rates. Outpatient services are generally paid based on cost reimbursement
 methodologies. Emory Healthcare's cost reports have been audited and substantially settled for all
 fiscal years through August 31, 2015. Revenue from the Medicaid program accounted for
 approximately 4% of Emory Healthcare's net patient service revenue for both years ended August 31,
 2018 and 2017.

Emory Healthcare has also entered into other reimbursement arrangements providing for payment methodologies, which include prospectively determined rates per discharge, discounts from established charges, and prospectively determined per diem rates.

The composition of net patient service revenue (excluding charity care) follows (in thousands):

	_	2018	2017
Gross patient service revenue	\$	9,893,872	9,106,824
Less provisions for contractual and other adjustments		(6,305,888)	(5,735,501)
Less provisions for uncollectible accounts		(183,980)	(196,904)
Net patient service revenue	\$	3,404,004	3,174,419

Emory Healthcare recognizes patient service revenue associated with services provided to patients with third-party payor coverage on the basis of contractual rates for the services rendered. For uninsured patients who

Notes to Consolidated Financial Statements
August 31, 2018 and 2017

do not qualify for financial assistance in accordance with Emory Healthcare's established charity/indigent care policy, Emory Healthcare recognizes revenue on the basis of its discounted rates for services provided. On the basis of historical experience, a significant portion of Emory Healthcare's uninsured patients are unable or unwilling to pay for the services provided. Thus, Emory Healthcare records a significant provision for uncollectible accounts related to uninsured patients in the period the services are provided.

Patient service revenue, net of contractual allowances and discounts (but before the provision for uncollectible accounts) recognized during the years ended August 31, 2018 and 2017 from these major payor sources is as follows (in thousands):

2010

	_	2018	2017
Third-party payors Self pay	\$	3,460,212 127,772	3,173,150 198,173
Total	\$	3,587,984	3,371,323

Notes to Consolidated Financial Statements August 31, 2018 and 2017

(6) Investments

The following table summarizes investments as of August 31 (in thousands):

		2018	2017
Short-term investments and cash equivalents (a)	\$	248,580	427,137
Investments in securities:			
Global equity securities			
U.S. equity securities		358,632	437,527
Non-U.S. equity securities		200,732	141,152
Fixed-income securities			
U.S government securities (b)		653,952	897,719
Domestic bonds and long-term notes (c)		590,216	431,770
International bonds and long-term notes (d)		208,163	174,647
Investments in private securities (e)		15,557	16,287
Commingled funds - equity (f)		360,446	762,567
Commingled funds - fixed income (t)		450,377	442,598
Investments in funds:			
Public market investments (g)		2,775,397	2,251,918
Private market investments (h)		1,512,157	1,261,446
Natural resources (1)		497,886	518,985
Real estate partnerships (1)		279,082	281,497
Derivatives (k)		(1,578)	(9,572)
Marketable real estate investments (1)		1,902	1,881
Oil and gas properties		1,155	680
Total investments at fair value		8,152,656	8,038,239
Joint ventures (equity method)	_	5,022	5,641
Total investments	\$	8,157,678	8,043,880

- (a) Includes short-term U.S. and non-U.S Treasury securities with maturities of less than one year, as well as funds that invest in these types of investments; at August 31, 2018 and 2017, \$4.1 million and \$24.2 million, respectively, was posted as collateral (primarily related to derivatives' trading agreements) and was not readily available for use.
- (b) Includes \$379.0 million of net pending trade payables related to unsettled forward purchases and sales of such securities as of August 31, 2018.
- (c) Includes investments in nongovernment debt securities. Investments consist primarily of credit-oriented securities including U.S investment-graded and below investment-graded debt securities; other investments include mortgage-based securities, asset-backed securities, repurchase agreements, senior loans, and bank loans.
- (d) Includes fixed-income investments in non-U.S debt securities, such as government bonds, corporate bonds, bank loans, and asset backed securities.

Notes to Consolidated Financial Statements August 31, 2018 and 2017

- (e) Includes investments in private securities not held through a traditional fund or commingled vehicle.
- (f) Includes professionally managed pooled investment funds registered with the Securities and Exchange Commission or the Comptroller of the Currency (i.e. mutual funds and collective trusts).
- (g) Includes investments in fund structures that pursue multiple strategies to diversify risks and reduce volatility, as well as \$353.0 million in investment subscriptions paid in advance. Fund managers have the ability to shift investments across a wide variety of sectors, geographies, and strategies and from a net long position to a net short position. Certain investments in public market investments may be subject to restrictions that limit the University's ability to withdraw capital until i) a certain "lock-up period" has expired or ii) until certain underlying investments designated as "illiquid" or "side pockets" are sold. In addition, this class includes investments that may be subject to restrictions that limit the amount that the University is able to withdraw as of a given redemption date.
- (h) Includes illiquid investments in venture capital, growth equity, buyout, mezzanine, distressed debt, and commingled vehicles in which Emory is typically a limited partner or shareholder; the nature of the investment in this category is such that distributions are received through liquidation of the underlying assets of the fund.
 As of August 31, 2018, it is estimated that underlying assets of the funds will be liquidated over the next 11 years.
- (i) Includes investments in timber, mining, energy, farmland, commodities, and related services businesses held through liquid and illiquid fund structures; the nature of the investments in this category is largely such that distributions are received through liquidation of the underlying assets of the funds. As of August 31, 2018, it is estimated that the underlying assets of the funds will be liquidated over the next nine years.
- (i) Includes illiquid investments in real estate assets, projects, or land held in commingled funds; the fair value of these investments is calculated from the NAV of Emory's ownership interests in these funds. The nature of the investments in this category is such that distributions are received through liquidation of the assets of the funds. As of August 31, 2018, it is estimated that the underlying assets underlying of the funds will be liquidated over the next ten years.
- (k) Includes investments in derivative instruments including both exchange traded and over the counter futures, forwards, swaps, options, rights, and warrants valued at the fair market value of each underlying instrument (note 8).
- (1) Includes miscellaneous investments in real estate such as land gifts.

At August 31, 2018 and 2017, cash equivalents of \$248.6 million and \$427.1 million, respectively, are included in investments and restricted for investment activity within the investment portfolio. The Investment Policy for the long-term asset portfolio contains a target allocation to cash equivalents of 3% with a tolerance band of +/- 10%.

The University's investment policy allows fund managers to use foreign exchange contracts, currency hedges, and other derivative transactions to reduce volatility and manage market risk in investment portfolios. These financial instruments are included in investments at fair value in the accompanying consolidated statements of financial position with the related gain or loss recognized as investment income and gains (losses) in excess of spending distributions for current operations in the accompanying consolidated statements of activities.

The University may hold investments denominated in currencies other than the U.S. dollar. Thus, there is exposure to currency risk because the value of the investments denominated in other currencies may fluctuate due to changes in currency exchange rates, and this can have an effect on the reported value of these investments.

The value of securities held by the University may decline in response to certain economic events, including those events impacting entities whose securities are owned and included in the investment portfolio. Those events impacting valuation may include (but are not limited to) economic changes, market fluctuations,

Notes to Consolidated Financial Statements August 31, 2018 and 2017

regulatory changes, global and political instability, and currency, interest rate, and commodity price fluctuations. The University attempts to manage this risk through diversification, ongoing due diligence of fund managers, and monitoring of economic conditions.

As of August 31, 2018, the related unfunded commitments of the University's alternative investments valued using the practical expedient and limitations and restrictions on the University's ability to redeem or sell are summarized as follows (in thousands):

	Unfunded commitments	Redemption frequency (if currently eligible)	Redemption notice period
Public market investments Private market investments Real estate partnerships Natural resources	\$ 20,000 916,428 296,239 186,473	30 days - over 2 years not eligible not eligible 30 days or not eligible	3 - 306 days not eligible not eligible 45 days or not eligible
1.0000200	\$ 1,419,140	20 days 21 not engione	.e days es not engione

Unfunded commitments are expected to be called by funds within five years of fund inception.

Investment return as reflected in the accompanying consolidated statements of activities for the years ended August 31 is as follows (in thousands):

		2018	2017
Investment income, net Realized and unrealized gains, net	\$	39,055 473,446	32,891 579,540
Total investment return	_	512,501	612,431
Operating Endowment spending distribution Other investment income designated for current operations Total operating return	_	182,562 81,257 263,819	179,696 72,622 252,318
Nonoperating Investment return in excess of spending distribution for current operations		248,682	360,113
Total investment return	\$	512,501	612,431

The University employs an internal core group of investment professionals dedicated to the management of Emory's investments and external investment managers.

(7) Endowment Net Assets

The University's Endowment (Endowment) consists of over 2,032 individual funds established for a variety of purposes, including both donor-restricted endowment funds and funds designated by the board of trustees

Notes to Consolidated Financial Statements August 31, 2018 and 2017

to function as endowments. The Endowment provides stable financial support to a wide variety of programs and activities, playing a critical role in enabling the University to achieve its mission. Net assets associated with these endowment funds are classified and reported based on the existence or absence of donor-imposed restrictions.

(a) Interpretation of Relevant Law

The board of trustees of the University has approved the University's adoption of the State of Georgia Uniform Prudent Management of Institutional Funds Act (UPMIFA), which provides standards for managing investments of institutional funds and spending from endowments. The University classifies as permanently restricted net assets (a) the original value of gifts donated to the permanent endowment, (b) the original value of subsequent gifts to the permanent endowment, and (c) accumulations to the permanent endowment made in accordance with the direction of the applicable donor gift instrument at the time the accumulation is added to the fund.

The remaining portion of the donor-restricted endowment fund that is not classified in permanently restricted net assets is classified as temporarily restricted net assets until those amounts are appropriated for expenditures by the University in a manner consistent with the standard of prudence prescribed by UPMIFA. In accordance with UPMIFA, the University considers several factors in making a determination to appropriate or accumulate donor-restricted endowment funds, including the duration and preservation of the fund, the purposes of the fund, general economic conditions, the possible effect of inflation and deflation, the expected total return from income and the appreciation of investments, other resources, and the investment policies of the University.

The endowment funds subject to UPMIFA are true endowments and do not include perpetual funds held by others, long-term investments, annuity funds, and deposits held in custody and miscellaneous investments. As of August 31, 2018, approximately 64.3% of the investments described in note 6 are classified as endowed net assets. Endowment funds are categorized in the following net asset classes as of August 31 (in thousands):

			2018		2017				
	_	Donor- restricted	Board- designated	Total	Donor- restricted	Board- designated	Total		
Unrestricted Temporarily restricted Permanently restricted	\$	(3,597) 2,765,582 923,950	1,556,384	1,552,787 2,765,582 923,950	(7,779) 2,642,490 881,625	1,498,575 —	1,490,796 2,642,490 881,625		
Total endowment funds	\$	3,685,935	1,556,384	5,242,319	3,516,336	1,498,575	5,014,911		

Notes to Consolidated Financial Statements August 31, 2018 and 2017

Changes in endowment funds by net asset classification for the years ended August 31 are summarized as follows (in thousands):

	Unrestricted	Temporarily Restricted	Permanently Restricted	Total

(b) Funds with Deficiencies

From time to time, the fair value of assets associated with individual donor-restricted endowment funds may fall below the level of the donor's original contribution. Deficiencies of this nature that are reported in unrestricted net assets were \$3.6 million and \$7.8 million as of August 31, 2018 and 2017, respectively. Subsequent gains that restore the fair value of the assets of the endowment fund to book value will be classified as an increase in unrestricted net assets.

Notes to Consolidated Financial Statements
August 31, 2018 and 2017

(c) Return Objectives and Risk Parameters

The University has adopted investment and spending policies for endowment assets that attempt to provide a predictable stream of funding to programs supported by its endowment while seeking to maintain the purchasing power of the endowment assets. Under this policy, as approved by the board of trustees, the endowment assets are invested within risk tolerances of the University to provide an expected total return in excess of spending and inflation over the long-term.

(d) Strategies Employed for Achieving Objectives

To satisfy its long-term, rate-of-return objectives, the University relies on a total return strategy in which investment returns are achieved through both capital appreciation (realized and unrealized) and current yield (interest and dividends). The University employs a diversified asset allocation strategy across global equities, fixed income, marketable alternatives, and private investments to achieve its long-term return objectives within prudent risk constraints. The Endowment's long-term target asset allocation is approved by the investment committee of the board of trustees. The portfolio is periodically rebalanced to the target weightings for each asset class.

(e) Relationship between Investment Objectives and Spending Policy

The University's board of trustees has established a spending policy that determines how endowment distributions are made. The distribution of endowment income in 2018 and 2017 was based on a hybrid spending policy formula, which is approved by the board of trustees and has both a constant budget growth component and market value based component. The target payout rate was 4.75% for FY 2018 and FY 2017. The University considers the expected return on its endowment, including the effect of inflation in setting the annual appropriation amount. Accordingly, the University expects the current spending policy to allow its endowment to maintain its purchasing power if projected growth rates are achieved. Additional real growth will be provided through new gifts and any excess investment return. The payout rate is approved annually by the board of trustees as part of the budget process.

(8) Derivative Instruments and Hedging Activities

Investments

The University has executed derivative financial instruments in the normal course of its business. Investment strategies employed by Emory and investment managers retained by Emory may incorporate futures, options, swaps, and other derivative instruments to adjust elements of investment exposures to various securities, markets, and currencies without actually taking a position in the underlying asset.

These instruments expose Emory to risk of an unexpected movement in the fair value of the underlying security, a counterparty failing to meet its obligations and, in certain circumstances, not being able to unwind a position at current fair value due to market illiquidity. Emory has established procedures to monitor and manage these risks. The purchase and sale of exchange-traded derivatives require collateral deposits with a Futures Commission Merchant (FCM). In the event of an FCM's insolvency, recovery may be limited to Emory's pro rata share of segregated customer funds available. It is possible that the recovery amount could be less than the total of cash and other equity deposited. Management does not consider the underlying counterparty risk will have a material impact on the financial position of the University.

Notes to Consolidated Financial Statements August 31, 2018 and 2017

Emory's net investment-related derivative exposures, categorized by primary underlying risk, as of and for the years ended August 31 (in thousands):

Debt

As a component of the debt portfolio, the University entered into interest rate swap agreements that effectively convert a portion of variable rate debt to fixed rates and are used to manage interest rate risk. The University's exchange arrangements are exposed to credit loss in the event of nonperformance by the counterparty and to interest rate risk driven by factors influencing the spread between the taxable and tax-exempt market interest rates on its basis exchange. Certain university derivative instruments contain provisions requiring long-term, unsecured debt to be maintained at specified credit ratings from Moody's Investors Service and Standard and Poor's Ratings Service. If the ratings of the University's debt were to fall below certain benchmarks, the counterparty could request immediate payment on derivatives in net liability positions. At August 31, 2018, the University's long-term debt ratings exceeded these benchmarks.

At August 31, 2018, Emory had nine interest rate swap agreements expiring on various dates ranging from November 15, 2028 through December 1, 2042. These agreements require Emory to pay fixed interest rates to the counterparties varying from 3.328% to 4.388% in exchange for variable rate payments from the counterparties based on a percentage of the three-month LIBOR.

Net settlement transactions related to the agreements described above resulted in interest expense totaling \$13.7 million and \$17.4 million during 2018 and 2017, respectively. The fair value of each exchange agreement is estimated based on pricing models that utilize significant observable inputs, such as relevant current interest rates, that reflect assumptions on the amount the University would receive or pay to terminate the agreement at the reporting date. As such, the University's exchange agreements are categorized as Level 2 in the fair value hierarchy.

Notes to Consolidated Financial Statements
August 31, 2018 and 2017

The aggregate fair value of all derivative instruments with credit-risk-related contingent features that are in a liability position was \$128.9 million and \$188.6 million, collateralized by \$0 and \$7.8 million of cash on August 31, 2018 and 2017, respectively. Collateral postings are reported in prepaid expenses, deferred charges, and other assets in the consolidated statements of financial position.

The following table summarizes the debt-related derivatives as of August 31 (in thousands):

Interest	Rate Swaps	_	201	18	20		
			Liability Fair	Unrealized	Liability Fair	Unrealized

June 23, 2015	September 1, 2035		(20,317)	11,175	(31,492)	12,502	
June 23, 2015	September 1, 2035		(6,854)	3,659	(10,513)	4,257	
	Total	\$	(128,861)	59,751	(188,612)	80,123	

Emory is exposed to financial loss in the event of nonperformance by a counterparty to any of the financial instruments described above. General market conditions could impact the credit standing of the counterparties and, therefore, potentially impact the value of the instruments. Emory management, with consultation from third-party financial advisors, controls this counterparty credit risk by considering the credit rating, business risk, and reputation of any counterparty before entering into a transaction, monitoring for any change in the credit standing of its counterparty during the life of the transaction, and requiring collateral be posted when predetermined thresholds are crossed. The swaps are exchanged with primarily six counterparties.

Notes to Consolidated Financial Statements August 31, 2018 and 2017

(9) Fair Values of Assets and Liabilities

Notes to Consolidated Financial Statements August 31, 2018 and 2017

Investments made directly by the University whose values are based on quoted market prices in active markets, and are therefore classified within Level 1, include actively traded common and preferred stock, U.S. government fixed-income instruments, and non-U.S. government fixed-income instruments. Level 1 investments may also include commingled funds, such as listed mutual funds, futures contracts, and exchange traded funds.

Investments that trade in markets that are considered to be active but are based on dealer quotations or alternative pricing sources supported by observable inputs or investments that trade in markets that are not considered to be active, but are valued based on quoted market prices, dealer quotations, or alternative pricing sources supported by observable inputs, are classified within Level 2. Alternative pricing sources include quotations from market participants and pricing models, which are based on accepted industry modeling techniques. These investments include U.S. investment grade and below investment grade debt securities, international corporate bonds, mortgage-backed securities, asset-backed securities, money market funds, senior loans and bank loans, most derivative contracts other than futures, and commingled structures with quoted market prices.

Investments that do not trade in active markets and for which values are instead derived from significant unobservable inputs are classified within Level 3. When observable prices are not available, these investments are valued using one or more valuation techniques described below.

- Market approach: This approach uses prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities.
- Income approach: This approach determines a valuation by discounting future cash flows.
- Cost approach: This approach is based on the principle of substitution and the concept that a market participant would not pay more than the amount that would currently be required to replace the asset.

The following tables summarize the University's Level 3 reconciliation for the years ended August 31, 2018 and 2017 (in thousands):

	_	Balance as of August 31, 2017	Net gains (losses)	Purchases	Sales	Transfer in (out) of Level 3	Balance as of August 31, 2018

(10) Property and Equipment

Property and equipment at August 31 is summarized as follows (in thousands):

	_	2018	2017
Land and land improvements	\$	201,887	201,696
Buildings and improvements		3,668,327	3,376,910
Equipment		2,435,931	2,308,381
Library and museum assets		438,429	414,132
Construction in progress		142,101	214,071
		6,886,675	6,515,190
Less accumulated depreciation	_	(3,667,670)	(3,412,342)
	\$	3,219,005	3,102,848

Property and equipment is reviewed for recoverability whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss shall be recognized only if the carrying amount of a long-lived asset is not recoverable and exceeds its fair value. The carrying amount of a long-lived asset is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. There were no asset impairments for fiscal year 2018 or 2017.

The University has identified asset retirement obligations primarily from commitments to remove asbestos and lead paint in university facilities at the time of major renovation or demolition. The liability was estimated using an inflation rate of 5.00% and discount rate of 4.74%. The liability for asset retirement obligations at August 31, 2018 and 2017 is \$66.0 million and \$63.0 million, respectively.

Notes to Consolidated Financial Statements August 31, 2018 and 2017

(11) Bonds and Notes Payable

Bonds and notes payable, including unamortized premiums, discounts, and issuance costs, consisted of the following at August 31 (dollars in thousands):

	Average	Final		Outstanding	principal
	interest rate	maturity		2018	2017
Tax-exempt fixed-rate revenue bonds:					
2016 Series A	4.62%	October 1, 2046	\$	130,030	130,030

Notes to Consolidated Financial Statements August 31, 2018 and 2017

- (1) Included in the 2009 Series Bonds is a medium-term maturity of \$43.0 million due on September 1, 2019 at an average interest rate of 4.68%.
- (2) Series 2013B and 2013C bonds are floating rate notes and interest rates are based on a spread to one month LIBOR and The Securities Industry and Financial Markets Association Index (SIFMA), respectively.

The University incurred interest expense of \$77.1 million and \$81.5 million in 2018 and 2017, respectively, net of capitalized interest of \$4.1 million and \$0.8 million in 2018 and 2017, respectively. During 2018 and 2017, the average interest rate on University tax-exempt and taxable variable rate demand bonds was 1.16% and 1.58%, respectively. Related indices for this period were 1.21% for tax-exempt debt (SIFMA) and 1.69% for taxable debt (LIBOR).

During 2017, the University refunded its 2008C and 2005A Series Bonds totaling \$147.2 million with proceeds from the University's issuance of 2016B Series Bonds. The University incurred an accounting loss of \$8.7 million on the refunding of the extinguishment of the 2008C and 2005A Series Bonds, which is included in the nonoperating activities in the accompanying 2017 consolidated statement of activities.

At August 31, 2018, the aggregate annual maturities of bonds and notes payable for the next five years and thereafter are as follows (in thousands):

Payable in fiscal year:	
2019	\$ 21,873
2020	302,418
2021	18,614
2022	13,461
2023	13,365
Thereafter	1,523,999
	1,893,730
Unamortized net premium	74,572
Unamortized net bond issuance costs	(8,405)
	\$ 1,959,897
	 <i>) </i>

In 2010, the University established a \$400.0 million tax-exempt Commercial Paper program. The primary purpose of the program is to meet interim financing needs related to capital projects. As of August 31, 2018 or 2017, the University had no outstanding balances under this program.

The University has a standby credit facility to enable the University to purchase tendered variable rate debt in the event of a failed remarketing. Currently, it has one diversified facility totaling \$150.0 million that is committed for this sole purpose and cannot be used for operating needs of the University. There were no draws against this line of credit in 2018 or 2017.

Emory University's healthcare system, Emory Healthcare, entered into an affiliation agreement with one of its payors effective June 11, 2018. This affiliation agreement includes, among other provisions, a \$100.0 million line of credit to Emory University, which can be utilized for any purpose that advances the charitable mission of Emory Healthcare. There is no outstanding balance on this line of credit as of August 31, 2018.

Notes to Consolidated Financial Statements
August 31, 2018 and 2017

Emory University has an additional \$75.0 million line of credit unrelated to this Emory Healthcare affiliation agreement for which there is also no outstanding balance as of August 31, 2018.

The University has two letters of credit with a commercial bank totaling \$1.4 million. There were no outstanding balances as of August 31, 2018 or 2017.

The terms of the University's long-term debt provide for certain financial and nonfinancial covenants, including provisions as to the use of the proceeds, limits as to arbitrage and bond issuance costs, and various other administrative requirements.

(12) Temporarily and Permanently Restricted Net Assets

Temporarily restricted net assets consist of the following as of August 31 (in thousands):

	2018	2017
Appreciation on endowments restricted until appropriated	\$ 2,640,672	2,517,580
Term endowments	124,910	124,910
Contributions receivable, time, and purpose restricted	372,500	48,447
Restricted for capital projects and other donor purposes	70,013	24,518
Annuity and life income agreements	8,576	7,141
	\$ 3,216,671	2,722,596

Permanently restricted net assets include endowment funds subject to UPMIFA (note 7) as well as perpetual trusts and endowments held by others. Permanently restricted net assets consist of the following as of August 31 (in thousands):

	_	2018	2017
Donor-restricted endowments	\$	923,950	881,625
Interests in perpetual funds held by others		1,271,786	1,244,906
Contributions receivable, restricted for endowment		23,627	31,961
Annuity and life income agreements		2,071	2,081
Split-interest trusts		3,245	3,268
	\$	2,224,679	2,163,841

Generally, the donors of these restricted gifts permit the University to use all or part of the income earned and net appreciation on related investments for general or specific purposes, such as scholarships, faculty salaries, or other operational and administrative support.

(13) Retirement and Deferred Compensation Plans

The University has a defined-contribution plan under Internal Revenue Code (IRC) Section 403(b) covering certain employees and teaching staff. The University contributes an amount equal to 6% of each eligible employee's compensation to the plan as well as a supplemental contribution of 3% based on a 1.5 to 1 match of employee contributions of up to 2% of compensation. Emory Healthcare sponsors a retirement plan, covering most full time employees, under which annuities are purchased with contributions by Emory Healthcare and its employees. The benefits are vested only to the extent of the annuities purchased. TEC

Notes to Consolidated Financial Statements
August 31, 2018 and 2017

sponsors The Emory Clinic, Inc. Retirement Savings Plan (the Plan), covering all its employees, except those considered leased employees or those covered under collective bargaining agreements, as defined. The Plan provides for employees to make salary reduction contributions and for TEC to make discretionary contributions for employees who have attained the age of 21 and are employees at the date the contribution is made. The Plan provides for contributions at an annual determined percentage of compensation and employees cliff vest in employer contributions after three years of service. Retirement expense totaled \$142.7 million and \$131.6 million during 2018 and 2017, respectively, and is included in operating expense in the accompanying consolidated statements of activities.

The University sponsors an IRC Section 457(b) Deferred Compensation Plan primarily for the purpose of providing deferred compensation for a select group of management or highly compensated employees who are eligible for participation and elect to make salary deferrals under the Deferred Compensation Plan. These assets are fully vested and available to the participating employees at the point of termination of employment from the University. As of August 31, 2018 and 2017, respectively, the University held other assets of \$134.7 million and \$115.7 million under the plan. These assets are included in other assets, which are designated by the University to pay future salary deferral plan payments. The assets are held in separate investment funds for which the majority are classified as Level 1 in the fair value hierarchy. Associated liabilities for the obligations of \$134.7 million and \$115.7 million as of August 31, 2018 and 2017, respectively, are included in accrued liabilities for benefit obligations and professional liabilities and considered Level 2 in the fair value hierarchy.

(14) Pension Plans - Emory Healthcare

Emory Healthcare sponsors a defined-benefit pension plan (the Plan). The Plan was curtailed effective December 31, 2011. The terms of the curtailment generally provide that no further benefit accrual under the Plan is provided for service after the effective date nor will new entrants into the Plan be permitted after the effective date.

The Joint Operating Company (JOC) assumed certain defined-benefit pension liabilities covering certain employees of the entities contributed to the JOC by SJHS (SJHS Pension Plan). The Plan was curtailed, effective December 31, 2011, and the JOC has agreed to provide for funding of the plan, generally over 10 years, beginning in fiscal year 2015, subject to certain terms and conditions.

The changes in the projected benefit obligations as of August 31 follow (in thousands):

	201	18	2017		
	Emory	SJHS	Emory	SJHS	
	Healthcare	Pension Plan	Healthcare	Pension Plan	
Projected benefit obligation, beginning of year \$ Interest cost Actuarial gains Benefits paid	326,875	154,690	324,577	160,393	
	11,614	6,180	10,605	6,042	
	(10,651)	(6,178)	(1,131)	(6,498)	
	(7,804)	(5,574)	(7,176)	(5,247)	
Projected benefit obligation, end of year \$	320,034	149,118	326,875	154,690	

Notes to Consolidated Financial Statements August 31, 2018 and 2017

Given the curtailment of the plans, the accumulated benefit obligations at August 31, 2018 and 2017 are the same as the projected benefit obligations.

The changes in the fair value of plan assets, funded status of the plans, and the status of amounts recognized in the accompanying consolidated statements of financial position as of August 31 follow (in thousands):

		201	18	2017		
		Emory Healthcare	SJHS Pension Plan	Emory Healthcare	SJHS Pension Plan	
Fair value of plan assets, beginning of year Actual return on plan assets Employer contributions Benefits paid	\$	235,118 12,969 11,089 (7,804)	110,316 9,406 7,240 (5,574)	213,181 19,666 9,447 (7,176)	99,096 10,197 6,270 (5,247)	
Fair value of plan assets, end of year	\$ _	251,372	121,388	235,118	110,316	
Funded status - accrued pension cost recognized in the consolidated statements of financial position	\$_	(68,662)	(27,730)	(91,757)	(44,374)	

The components of net periodic pension cost for the years ended August 31 follow (in thousands):

	201	18	2017		
	Emory Healthcare	SJHS Pension Plan	Emory Healthcare	SJHS Pension Plan	
Interest cost Expected return on plan assets Amortization of prior service cost Recognized actuarial loss	\$ 11,614 (18,827) 3,552 2,295	6,180 (7,777) (438) 1,866	10,605 (17,156) 3,061 2,576	6,042 (6,971) (438) 2,196	
Net periodic pension cost	\$ (1,366)	(169)	(914)	829	

Net periodic costs are recognized as employees render the services necessary to earn the pension and postretirement benefits.

Notes to Consolidated Financial Statements
August 31, 2018 and 2017

Emory Healthcare Plan Assets

The Plan's investment objectives are to protect long-term asset value by applying prudent, low-risk, high-quality investment disciplines and to enhance the values by maximizing investment returns through active security management within the framework of the Plan's investment policy. Asset allocation strategies and investment management structure are designed to meet the Plan's investment objectives.

The Plan's expected long-term rate of return on assets is determined by reviewing the historical return of each asset category comprising the Plan's target asset allocation.

The following table summarizes the Plan's assets, which are recorded at fair value as of August 31 (in thousands):

	2018							
	Total	Fair value	hierarchy	Target	Total asset			
	fair value	Level 1	Level 2	allocation	allocation

Commingled funds - fixed income	71,494		71,494	30	30			

SJHS Pension Plan Assets

Under the terms of the agreement forming the JOC, the assets of the SJHS Pension Plan formally remain assets of SJHS and the plan assets remain invested in the CHE Trinity Health Pension Investment Program. Accordingly, neither the JOC nor Emory Healthcare has discretion over the management of the plan assets. However, the plan assets related to the entities contributed to the JOC (and certain other employees leased to the JOC) are contractually required to be clearly separated from the plan assets of the other entities participating in the CHE Trinity Health Employee Pension Program. The SJHS Pension Plan's investment objectives are to protect long-term asset value by applying prudent, low-risk, high-quality investment disciplines and to enhance the values by maximizing investment returns through active security management within the framework of the plan's investment policy. Asset allocation strategies and investment management structure are designed to meet the plan's investment objectives.

Notes to Consolidated Financial Statements August 31, 2018 and 2017

The SJHS Pension Plan's expected long-term rate of return on assets is determined by reviewing the historical return of each asset category comprising the plan's target asset allocation.

The following table summarizes the Plan's assets, which are recorded at fair value as of August 31 (in thousands):

		2018					
	_	Total	Fair value	hierarchy	Target	Total asset	
		fair value	Level 1	Level 2	allocation	allocation

Cash Flows

Emory Healthcare expects to contribute \$10.5 million to the Emory Healthcare Pension Plan and \$6.4 million to the SJHS Pension Plan in fiscal year 2019.

Expected Future Benefit Payments

Emory Healthcare annual future benefit payments, excluding lump-sum settlements, are expected to range from \$8.7 million to \$14.3 million for the next five years. SJHS Pension Plan annual future benefit payments, excluding lump-sum settlements, are expected to range from \$6.2 million to \$7.6 million for the next five years.

Other Items

Emory Healthcare uses the straight-line method to amortize prior service cost for both plans.

(15) Postretirement Healthcare and Life Insurance Benefits

The University sponsors a postretirement life insurance and healthcare benefits plan. Participants hired after 2002 pay the full retiree-specific premium equivalent and are therefore assumed to pay the full cost of their coverage. The University and Emory Healthcare each fund a separate trust (VEBA Trust) for retiree health

Notes to Consolidated Financial Statements August 31, 2018 and 2017

and life benefits. The assets of the VEBA Trust are invested primarily in equity and fixed-income securities. The University funds these benefits only to the extent of current retiree claims. The University measures its participation in the VEBA Trust at August 31 each fiscal year.

The changes in the accumulated postretirement benefit obligation (APBO) as of August 31 are as follows (in thousands):

				2017	
	_	Emory University	Emory Healthcare	Total	Total
APBO, beginning of year	\$	102,631	58,601	161,232	161,116
Service cost		1,680	713	2,393	2,308
Interest cost		3,634	2,039	5,673	5,181
Actuarial gains		(2,201)	(1,121)	(3,322)	(2,602)
Benefits paid	_	(3,072)	(2,256)	(5,328)	(4,771)
APBO, end of year	\$_	102,672	57,976	160,648	161,232

The changes in the fair value of plan assets, funded status of the plan, and the status of the accrued postretirement benefit obligation recognized in the accompanying consolidated statements of financial position as of August 31 are as follows (in thousands):

	_	Emory University	Emory Healthcare	Total	Total
Fair value of plan assets, beginning of year Actual return on plan assets Benefits paid by Emory	\$	68,209 5,234	20,452 1,401 (2,256)	88,661 6,635 (2,256)	80,416 9,623 (1,378)
Fair value of plan assets, end of year	\$	73,443	19,597	93,040	88,661
Funded status - accrued postretirement benefit cost recognized in the consolidated statements of financial position	\$	(29,229)	(38,379)	(67,608)	(72,571)

Actuarial assumptions used to determine the values of the APBO and the benefit costs for years ended August 31, 2018 and 2017 included a discount rate of 4.31% and 4.11%, respectively. Since the plan was amended on April 11, 2002 to limit the University's liability for future medical care cost increases to 4.00%, the per capita cost increase of healthcare benefits is capped at 4.00%. The estimated long-term rate of return on plan assets was 8.00% for the University and Emory Healthcare for both years ended August 31, 2018 and 2017.

Notes to Consolidated Financial Statements
August 31, 2018 and 2017

The components of net periodic postretirement benefit cost for years ended August 31 were as follows (in thousands):

		2018			2017
		Emory University	Emory Healthcare	Total	Total
Service cost of benefits earned	\$	1,680	713	2,393	2,308
Interest cost on APBO		3,634	2,039	5,673	5,181
Expected return on plan assets		(5,334)	(1,559)	(6,893)	(6,218)
Recognized net actuarial loss	_	2,216	2,350	4,566	6,126
Net periodic postretirement					
benefit cost	\$	2,196	3,543	5,739	7,397

The amounts accumulated in unrestricted net assets follow (in thousands):

				2017	
	_	Emory University	Emory Healthcare	Total	Total
Net unrecognized actuarial loss Prior service cost	\$	39,610 (146)	20,749 120	60,359 (26)	68,254 46
Total	_	39,464	20,869	60,333	68,300

In fiscal year 2019, net unrecognized actuarial losses of \$2.0 million for Emory University and \$1.9 million for Emory Healthcare are expected to be amortized from unrestricted net assets into net periodic postretirement benefit cost.

Plan Assets

The investment committee of the Emory University board of trustees approves the investment guidelines and asset allocation targets for the pension benefits and postretirement benefits plans. The primary objective of the investments is to ensure the solvency of the plans over time to meet plan obligations. The secondary objective is to meet or exceed the plans' actuarial assumed rate of return over time without taking excess risk. The funds are diversified by asset class in accordance with established allocation targets and rebalanced as needed. Specific investments are apportioned to a combination of institutional pooled funds and mutual funds.

Notes to Consolidated Financial Statements August 31, 2018 and 2017

The following table summarizes the University's VEBA Trust assets as of August 31 (in thousands):

Cash Flows

Emory Healthcare does not expect to contribute to the postretirement benefit plan during fiscal year 2019.

Notes to Consolidated Financial Statements
August 31, 2018 and 2017

Expected Future Benefit Payments

Annual future benefit payments are expected to range from \$3.5 million to \$4.7 million for Emory University and from \$2.0 million to \$2.8 million for Emory Healthcare for the next five years.

(16) Charity Care and Community Benefits

Emory Healthcare provides care to patients who meet certain criteria under their charity care policies without charge or at amounts less than their established rates. Because such operating companies do not pursue collection of amounts determined to qualify as charity care, such amounts are not included in net patient service revenue. Emory Healthcare applies the measurement and disclosure provisions of FASB ASU No. 2010-23, *Health Care Entities (Topic 954): Measuring Charity Care for Disclosure*. ASU No. 2010-23 amends ASC Subtopic 954-605, *Health Care Entities – Revenue Recognition*, and requires that cost be used as the measurement basis for charity care disclosure purposes.

Records are maintained to identify and monitor the level of charity care provided. These records include the amount of charges foregone and actual costs for services furnished under its charity and indigent care policies. The cost of charity care provided totaled approximately \$99.7 million and \$74.7 million for the years ended August 31, 2018 and 2017, respectively. Emory Healthcare estimated these costs by applying a ratio of cost to gross charges to the gross uncompensated charges associated with providing care to the charity patients.

(17) Functional Expenses

The consolidated statements of activities include the following functional expenses for the years ended August 31 (in thousands):

	2018	2017
Instruction	\$ 458,270	454,276
Research	516,489	490,306
Public service	120,233	102,796
Academic support	174,975	162,308
Student services	102,684	95,017
Institutional support	205,043	199,057
Scholarships and fellowships	23,949	17,668
Medical services	306,932	263,842
Healthcare services	3,398,654	3,145,643
Auxiliary enterprises	46,533	46,554
Independent operations	 22,652	22,062
Total operating expenses	\$ 5,376,414	4,999,529

Costs related to the University's operation and maintenance of property, including depreciation of property and equipment and interest on related debt, are allocated to program and supporting activities based upon information reported in the space study and debt financing records. Total amounts allocated in 2018 and 2017 were \$188.7 million and \$192.0 million, respectively. Fundraising costs were approximately \$38.9 million and \$34.1 million in 2018 and 2017, respectively.

Notes to Consolidated Financial Statements August 31, 2018 and 2017

(18) Medical Professional and General Liability Insurance Coverage

CCIC, Emory Healthcare's wholly owned offshore captive insurer, provides claims-made primary medical professional and general liability coverage for the University, the Hospitals, Emory Clinic, Emory Specialty Associates, and Wesley Woods Center.

As of August 31, 2018 and 2017, the University has recorded an accrual for estimated losses associated with all retained CCIC risks of approximately \$144.6 million (discounted at 2%) and \$121.5 million (discounted at 2%), respectively.

Emory has purchased layered excess and umbrella insurance and reinsurance coverage beyond the amounts retained by CCIC, through various carriers, for a total of \$129.0 million per claim and in the aggregate.

The estimated liability for professional and general liability claims will be significantly affected if current and future claims differ from historical trends. While the University monitors reported claims closely and considers potential outcomes as estimated by its actuaries when determining its professional and general liability accruals, the complexity of the claims, the extended period of time to settle the claims, and the wide range of potential outcomes complicate the estimation. The University's management believes adequate provision has been made for the related risk.

(19) Related-Party Transactions

The Carter Center, Inc. (CCI) is a nonprofit organization founded by former U.S. President Jimmy Carter and Rosalynn Carter, which sponsors various domestic and international programs. The board of trustees of CCI comprises 16 to 28 members, including its founders, and others as elected half by the University, including the University's president, and half by the Carter Center class trustees. The University's board of trustees has the authority to approve amendments to CCI's articles of incorporation and bylaws.

Funds held in trust for others include \$758.2 million and \$708.4 million representing CCI's investment in the University's long-term investment portfolio of August 31, 2018 and 2017, respectively.

(20) Commitments and Contingencies

The University is in the process of constructing, renovating, and equipping certain facilities for which the outstanding commitments at August 31, 2018 totaled \$68.2 million.

Expenditures and indirect costs related to federal and state grants and contracts are subject to adjustment based upon review by the granting agencies. The amounts, if any, of expenditures, which may be disallowed by the granting agencies cannot be determined at this time, although management expects they will not have a material effect on the University's consolidated financial statements.

Lawsuits and claims have been filed against the University in the ordinary course of business. As one of the nation's largest research universities and academic medical centers, the University has active litigation that takes several forms. The University's policy is to accrue for litigation and claims when such amounts are probable and can be reasonably estimated based on consultation with external legal counsel and Emory General Counsel review. In addition, the University is subject to many federal and state regulations, and as a result, there may be one or more pending government investigations ongoing at any time. While the outcome of many of these actions is not presently determinable, it is the opinion of management that any

Notes to Consolidated Financial Statements
August 31, 2018 and 2017

resulting liability from these actions will not have a material adverse effect on the consolidated financial position or operating results of the University. The University also has a comprehensive program of primary and excess insurance. Management of the University believes any current pending lawsuit subjecting the University to liability would not have a materially adverse effect on the University's consolidated financial position.

(21) Subsequent Events

Emory has evaluated subsequent events after the consolidated statement of financial position date of August 31, 2018 through January 30, 2019, the date the consolidated financial statements were available to be issued and noted that there are no other items to disclose except as follow:

On September 1, 2018, Emory Healthcare entered into a Definitive Agreement with DeKalb Regional Health System (DRHS) and became the sole and controlling member of DRHS upon acquisition of DRHS's assets and liabilities with the goal of DRHS being integrated operationally, financially, and clinically into Emory Healthcare. DRHS operates a 451-bed general acute care hospital with a freestanding surgery center in Decatur, Georgia; a 100-bed general acute care hospital in Hillandale, Georgia; a 76-bed long-term acute care hospital in Decatur, Georgia; and a physician network of primary care, occupational, and specialty physician practices. The terms of Definitive Agreement addressed, among other matters, the positioning of currently outstanding DRHS indebtedness, commitments of future capital funding, and amendments to the current long-term and transfer agreement between DRHS and the Hospital Authority of DeKalb County, Georgia.

Effective September 1, 2018, Emory University and Children's Healthcare of Atlanta, Inc. (Children's), a Georgia nonprofit corporation, have entered into a Master Affiliation Agreement (the affiliation agreement) to establish the Emory and Children's Pediatric Institute (the Institute). The affiliation agreement restructures previous arrangements between the parties for pediatric teaching, research, and related clinical services. Under the terms of the affiliation, approximately 350 Emory University School of Medicine Department of Pediatrics faculty physicians and PhD researchers have transferred to the Institute and became employees thereof. The ownership of the Institute will be 50% Emory University and 50% Children's with equal representation on the governing board.

On September 13, 2018, Emory issued \$164.4 million of its tax-exempt Commercial Paper program to defease DRHS's outstanding debt, DeKalb County Hospital Authority Revenue Anticipation Certificates (DeKalb Medical Center Inc. Project), Series 2010 issued in the original aggregate principal amount of \$183.1 million.

KPMG LLP Suite 2000 303 Peachtree Street, N.E. Atlanta, GA 30308-3210

Independent Auditors' Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance With Government Auditing Standards

The Board of Trustees Emory University Atlanta, Georgia

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, the consolidated financial statements of Emory University and its subsidiaries (the University), which comprise the consolidated statement of financial position as of August 31, 2018, and the related consolidated statements of activities and cash flows for the year then ended, and the related notes to the consolidated financial statements, and have issued our report thereon dated January 31, 2019.

Internal Control Over Financial Reporting

In planning and performing our audit of the consolidated financial statements, we considered the University's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the consolidated financial statements, but not for the purpose of expressing an opinion on the effectiveness of the University's internal control. Accordingly, we do not express an opinion on the effectiveness of the University's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the University's consolidated financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the University's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the University's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Notes to Supplementary Schedules of Expenditures of Federal Awards and Cash Receipts and Expenditures of State of Georgia Awards

Year ended August 31, 2018

(1) Summary of Significant Accounting Policies

The accompanying supplementary schedule of expenditures of federal awards (the Schedule) includes the federal grant activity of Emory University (the University) and is presented on the accrual basis of accounting. The Schedule presents all federal assistance received directly from the federal government and awards passed through to the University from non-federal organizations pursuant to federal grants, contracts and similar agreements. The information in the Schedule is presented in accordance with the requirements of Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance). Therefore, some amounts presented in the Schedule may differ from amounts presented in, or used in the preparation of, the consolidated financial statements.

The accompanying supplementary schedule of cash receipts and expenditures of State of Georgia awards includes expenditures incurred (i.e., on an accrual basis) by the University and grant revenues received from State of Georgia agencies under various state contracts.

Negative balances represent programs with unfunded expenditures prior to normal closeout procedures, which were subsequently transferred to unrestricted cost centers.

(2) Noncash Federal Assistance

Most federal financial assistance is in the form of cash awards. However, there are a number of federal programs that do not involve cash transactions with the University. These noncash transactions in which the University obtains other assistance are the Federal Direct Student Loan Program (FDSLP) and revolving loan programs, such as the Federal Perkins Loan Program.

The loans advanced and related expenditures are as follows for the various student loan programs:

	CFDA number		Amount
Federal Direct Student Loan Programs: Student loans advanced:	0.4.000	Φ.	0.700.404
Subsidized Stafford Loan Program Unsubsidized Stafford Loan Program	84.268 84.268	\$ _	8,766,401 69,939,518
Total Direct Stafford Loan Program			78,705,919
Federal Direct PLUS Loan Program		_	44,985,529
Total Direct Student Loan Programs		\$_	123,691,448
Federal Perkins Loan Program	84.038	\$	788,827

Notes to Supplementary Schedules of Expenditures of Federal Awards and Cash Receipts and Expenditures of State of Georgia Awards

Year ended August 31, 2018

The Federal Perkins Loan Program is administered directly by the University and balances and transactions relating to this program are included in the University's consolidated financial statements. Federal Perkins loans outstanding at August 31, 2018 totaled \$9,473,058.

The University is responsible for the performance of certain administrative duties with respect to the FDSLP loan program. It is not practicable to determine the balance of loans outstanding to students and former students of the University under this program as of August 31, 2018. These loans are not included in the University's consolidated financial statements.

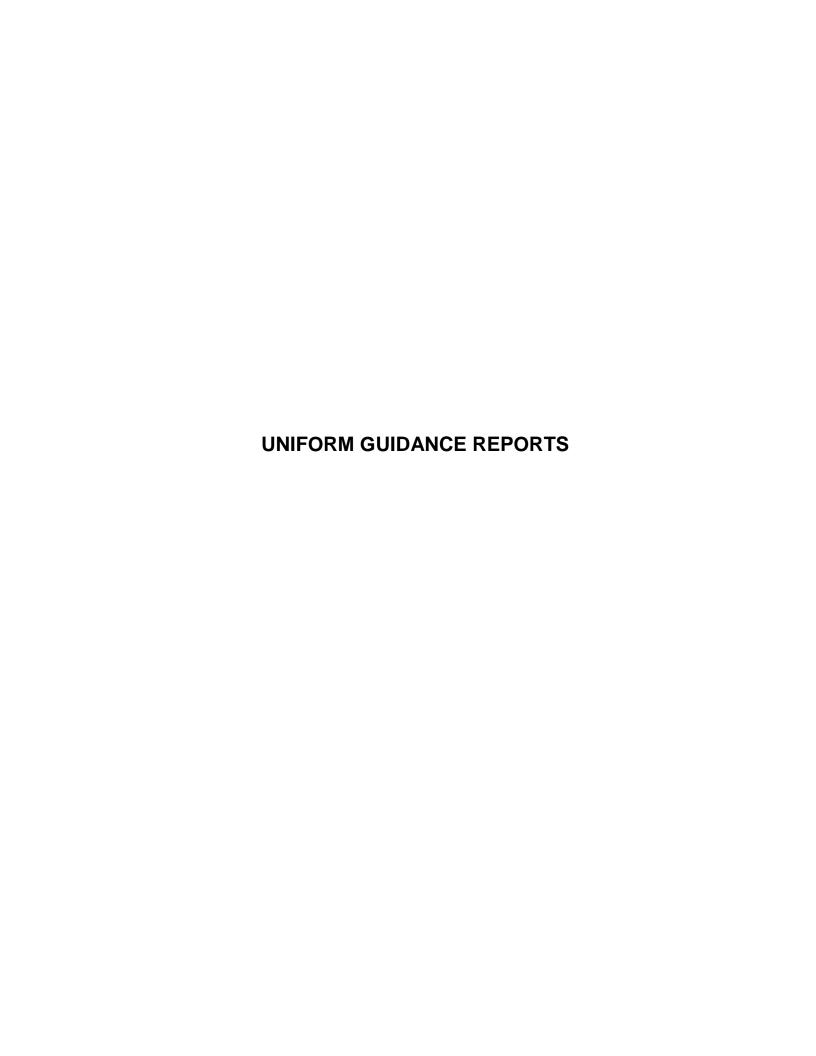

(3) Matching

Under the Federal Supplemental Educational Opportunity Grant program, the University matched \$353,734 in funds awarded to students for the year ended August 31, 2018 in addition to the federal share of expenditures included in the Schedule.

Under the Federal Work Study program, the University matched \$600,806 in total compensation to students for the year ended August 31, 2018 in addition to the federal share of expenditures included in the Schedule.

(4) Indirect Costs

For the year ended August 31, 2018, the University did not elect to use the 10% de minimis Indirect Cost Rate permitted by the Uniform Guidance.

KPMG LLP Suite 2000 303 Peachtree Street, N.E. Atlanta, GA 30308-3210

Independent Auditors' Report on Compliance for Major Program; Report on Internal Control Over Compliance; and Report on Supplementary Schedule of Expenditures of Federal Awards Required by the Uniform Guidance and Supplementary Schedule of Cash Receipts and Expenditures of State of Georgia Awards

The Board of Trustees Emory University:

Report on Compliance for Major Federal Program

We have audited Emory University's compliance with the types of compliance requirements described in the *OMB Compliance Supplement* that could have a direct and material effect on Emory University's major federal program for the year ended August 31, 2018. Emory University's major federal program is identified in the summary of auditors' results section of the accompanying schedule of findings and questioned costs.

Management Responsibility

Management is responsible for compliance with federal statutes, regulations, and the terms and conditions of its federal awards applicable to its federal programs.

Auditors' Responsibility

Our responsibility is to express an opinion on compliance for Emory University's major federal program based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the audit requirements of the Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Those standards and the Uniform Guidance require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about Emory University's compliance with those requirements and performing such other procedures as we consider necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for Emory University's major federal program. However, our audit does not provide a legal determination of Emory University's compliance.

Opinion on Major Federal Program

In our opinion, Emory University complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on its major federal program for the year ended August 31, 2018.

Other Matters

The results of our auditing procedures disclosed other instances of noncompliance, which are required to be reported in accordance with the Uniform Guidance and which are described in the accompanying schedule of findings and questioned costs as items 2018-001 and 2018-002. Our opinion on the major federal program is not modified with respect to these matters.

Emory University's responses to the noncompliance findings identified in our audit are described in the accompanying schedule of findings and questioned costs. Emory University's responses were not subjected to the auditing procedures applied in the audit of compliance, and accordingly, we express no opinion on the responses.

Report on Internal Control Over Compliance

Management of Emory University is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered Emory University's internal control over compliance with the types of requirements that could have a direct and material effect on Emory University's major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for Emory University's major federal program and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of Emory University's internal control over compliance.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A material weakness in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, we identified certain deficiencies in internal control over compliance, as described in the accompanying schedule of findings and questioned costs as items 2018-001 and 2018-002, that we consider to be significant deficiencies.

Emory University's responses to the internal control over compliance findings identified in our audit are described in the accompanying schedule of findings and questioned costs. Emory University's responses were not subjected to the auditing procedures applied in the audit of compliance, and accordingly, we express no opinion on the responses.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

Report on Supplementary Schedule of Expenditures of Federal Awards Required by the Uniform Guidance and Supplementary Schedule of Cash Receipts and Expenditures of State of Georgia Awards

We have audited the consolidated financial statements of Emory University and subsidiaries as of and for the year ended August 31, 2018, and have issued our report thereon dated January 31, 2019, which contained an unmodified opinion on those consolidated financial statements. Our audit was conducted for the purpose of forming an opinion on the consolidated financial statements as a whole. The accompanying supplementary schedule of expenditures of federal awards and supplementary schedule of cash receipts and expenditures of State of Georgia awards are presented for purposes of additional analysis as required by the Uniform Guidance and the State of Georgia, respectively, and is not a required part of the consolidated financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the consolidated financial statements. The information has been subjected to the auditing procedures applied in the audit of the consolidated financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the consolidated financial statements or to the consolidated financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supplementary schedule of expenditures of federal awards and supplementary schedule of cash receipts and expenditures of State of Georgia awards are fairly stated, in all material respects, in relation to the consolidated financial statements as a whole.

March 25, 2019

Schedule of Findings and Questioned Costs Year ended August 31, 2018

(1) Summary of Auditors' Results

- (a) The type of auditors' report issued on whether the consolidated financial statements were prepared in accordance with U.S. generally accepted accounting principles: **Unmodified**
- (b) Internal control deficiencies over financial reporting disclosed by the audit of the consolidated financial statements:
 - Material weaknesses: No
 - Significant deficiencies: None reported
- (c) Noncompliance which is material to the consolidated financial statements: No
- (d) Internal control deficiencies over major program disclosed by the audit:
 - Material weaknesses: No
 - Significant deficiencies: Yes See findings 2018-001 and 2018-002
- (e) Type of auditors' report issued on compliance for major program: Unmodified
- (f) Audit findings which are required to be reported under 2 CFR 200.516(a): **Yes See findings 2018-001 and 2018-002**
- (g) Major program: Student Financial Assistance Cluster (various CFDA numbers)
- (h) Dollar threshold used to distinguish between Type A and Type B programs: \$3,000,000
- (i) Auditee qualified as a low-risk auditee: Yes
- (2) Findings Relating to the Consolidated Financial Statements Reported in Accordance with Government Auditing Standards

None.

Schedule of Findings and Questioned Costs Year ended August 31, 2018

(3) Findings and Questioned Costs Relating to Federal Awards

Finding No. 2018-001

Enrollment Reporting

Federal Program:

Student Financial Assistance Cluster

CFDA Numbers:

84.033; 84.007; 84.063; 84.268; 84.038

Federal Agency:

U.S. Department of Education

Federal Award Year:

July 1, 2017 to June 30, 2018

Criteria or Requirement

Under the Pell grant and Department of Education (ED) loan programs, institutions must complete and return within 15 days the Enrollment Reporting roster file (FPL, 34 CFR Section 674.19; Pell, 34 CFR Section 690.83(b)(2); FFEL, 34 CFR Section 682.610; Direct Loan, 34 CFR Section 685.309). Once received, the institution must update the file for changes in student status, report the date the enrollment status was effective, enter the new anticipated completion date, and submit the changes electronically through the batch method or the National Student Loan Data System (NSLDS) Web site. Enrollment information must be reported within 30 days whenever attendance changes for students, unless a roster will be submitted within 60 days. Institutions are responsible for timely reporting, whether they report directly or via a third-party servicer.

Condition Found, Including Facts That Support the Deficiency Identified in the Finding and Information to Provide Proper Perspective for Judging the Prevalence and Consequences of the Finding

In a sample of 40 students, we identified one student in the fall semester and two students in the spring semester in which the student's status changes were not reported within 60 days, as required. Rather, these two status change instances were reported in 179 and 70 days, respectively. We further identified one instance in the fall and one instance in the spring semester in which the students' status as presented by the University did not agree with the status transmitted to NSLDS.

Cause and Possible Asserted Effect

The monitoring control over timely submission of student status changes was not operating effectively during the fall and spring semester because there was a lack of a sufficient control around timely communication of leave of absences from the departments to the Registrar's office. Further, there was a lack of a sufficient control to ensure the student's status properly agreed between the University and NSLDS.

Questioned Costs

There were no questioned costs associated with the finding.

Schedule of Findings and Questioned Costs Year ended August 31, 2018

Statistically Valid Sample

The sample was not intended to be, and was not, a statistically valid sample.

Identification of whether the audit finding was a repeat of a finding in the immediately prior audit This is not a repeat finding.

Recommendation

We recommend that Emory University strengthen its processes and controls within the Registrar's Office to help ensure that student status changes are communicated timely to the NSLDS and that additional supervisory review procedures be implemented to monitor timely reporting of status changes and required transmissions.

View of Responsible Officials

Management concurs with the finding. A sample of 40 students identified one student in the fall semester and two in the spring semester whose enrollment changes were not relayed to the NSC/NSLDS within the prescribed reporting timeframe. These instances were the result of substantial delays in the students' notice of withdrawal/discontinuation. There was also additional lag in processing of those notifications at the department level, which subsequently delayed the relay of information to the Office of the University Registrar. To eliminate similar findings in the future, the Registrar's Office will request a list of all students who are likely unofficial drops due to lack of significant academic activity mid-way through the semester. Department liaisons will prepare information which will include an effective date on applicable students and submit it through the prescribed workflow system on a mandatory deadline, which will be defined as the determining date of status change for reporting this information to the NSC. The Registrar's Office will communicate changes to department liaisons as well as the requirement that departments notify the Registrar's Office within 5 business days. The Registrar's Office will also adjust productions schedules to allow the processing of these updates within 5 business days of department notification.

Schedule of Findings and Questioned Costs Year ended August 31, 2018

Finding No. 2018-002
Reporting – Pell Disbursements
Federal Program:

Student Financial Assistance Cluster

CFDA Number:

84.063

Federal Agency:

U.S. Department of Education

Federal Award Year:

July 1, 2017 to June 30, 2018

Criteria or Requirement

Under the Federal Register (82 FR 29061), all schools receiving Pell grants submit Pell payment data to the Department through the Common Origination and Disbursement (COD) System. Institutions must report student payment data within 15 calendar days after the school makes a payment; or becomes aware of the need to make an adjustment to previously reported student payment data or expected student payment data. Schools may do this by reporting once every 15 calendar days, bi-weekly, or weekly, or may set up their own system to ensure that changes are reported in a timely manner.

Condition Found, Including Facts That Support the Deficiency Identified in the Finding and Information to Provide Proper Perspective For Judging the Prevalence and Consequences of the Finding

In a sample of 40 students with Pell disbursements, we identified 20 instances from the Fall semester in which the initial Pell disbursement notification to the COD was within 15 days; however, the original record was rejected by the COD and the corrected notifications were made between 29-42 days and not within 15 days as required.

Cause and Possible Asserted Effect

The University timely reported initial Pell disbursement notifications; however, due to the high volume of rejections from the COD and the limited resources to correct the rejections, the monitoring control was not operating effectively during the Fall semester, resulting in noncompliance.

Questioned Costs

There were no questioned costs associated with the finding.

Statistically Valid Sample

The sample was not intended to be, and was not, a statistically valid sample.

Schedule of Findings and Questioned Costs Year ended August 31, 2018

Identification of whether the audit finding was a repeat of a finding in the immediately prior audit This is not a repeat finding.

Recommendation

We recommend that Emory University strengthen its processes and controls around Pell disbursement reporting to ensure that disbursements outside of normal batch processing are reported timely to the COD. Further, we recommend that Emory University monitor submissions so that any rejections are timely remediated.

View of Responsible Officials

Management concurs with the finding. The finding noted 20 students who received Pell disbursements which were not reported in a timely manner. Almost all Pell disbursements records during fall 2017 were reported within 15 days of disbursement; however, the original disbursement record rejected at COD due to a Pell cost of attendance (COA) in excess of \$100,000. It was the cleanup and subsequent reporting of these records that fall outside the 15-day requirement.

The annual COA for Emory schools exceeds \$50,000. Delivered logic within PeopleSoft combined with standard operational practices created instances where a student's COA calculated an annual, 2 semester, Pell COA rather than a semester, Pell COA. As a result, subsequent reporting looks to have COA 3 times the allowable amount, and therefore the disbursement record rejects. To resolve this problem, the Office of Financial Aid made two changes. First, a systematic process was created to build fall and spring semester COAs at the same time. Secondly, as part of a system upgrade to Oracle 9.2 security access was removed to prevent advising staff from building a semester COA. These two changes have eliminated the possibility of having an annual Pell COA reject at COD. Further, rather than solely relying on one staff member to monitor Pell reporting several staff members will be reviewing reporting rejects twice a week. This will help ensure that rejected records get the immediate attention they need.
