Independent Auditors' Report

The Board of Trustees Emory University:

Report on the Consolidated Financial Statements

We have audited the accompanying consolidated financial statements of Emory University and its subsidiaries (the University), which comprise the consolidated statements of financial position as of August 31, 2020 and 2019, the related consolidated statements of activities and cash flows for the years then ended, and the related notes to the consolidated financial statements.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Emory University and its subsidiaries as of August 31, 2020 and 2019, and the changes in their net assets and their cash flows for the years then ended, in accordance with U.S. generally accepted accounting principles.

Emphasis of Matters

As discussed in note 2(u) to the consolidated financial statements, in fiscal year 2020, Emory University and its subsidiaries adopted new accounting guidance, Accounting Standards Update (ASU) No. 2016-18, Statement of Cash Flows (Topic 230): Restricted Cash, and ASU No. 2016-02, Leases (Topic 842), as amended. Our opinion is not modified with respect to these matters.

Other Reporting Required by Government Auditing Standards

In accordance with Government Auditing Standards, we have also issued our report dated December 18, 2020 on our consideration of the University's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the University's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the University's internal control over financial reporting and compliance.

AUGUST 31, 2020 AND 2019

(1) Organization

Emory University (the University or Emory) is a private, coeducational, not-for-profit institution, located in Atlanta, Georgia. Founded in 1836, Emory owns and operates educational, research, and healthcare facilities to support its mission. Emory provides educational services to approximately 8,000 undergraduate students and 7,000 graduate and professional students within its nine schools and colleges. Included within the University is the Emory Healthcare System (Emory Healthcare), Emory Medical Care Foundation, and Emory Innovations, LLC.

Emory Healthcare consists of Emory Healthcare, Inc. (EHC) and its controlled operating companies, including Emory University Hospital Midtown (EUHM), Emory University Hospital (EUH), Emory Saint Joseph's Hospital (ESJH), EHCA Johns Creek Hospital, LLC (EJCH), Emory Rehabilitation Hospital (ERH), DeKalb Medical Center, Inc. (DMC), Decatur Health Resources, Inc. (DHR), DeKalb Medical Center Foundation (DMCF), DeKalb Regional Health System Ventures, Inc. (Ventures), The Emory Clinic, Inc. (TEC), Emory Specialty Associates, LLC (ESA), Emory Specialty Associates - Joint Operating Company (ESA-JOC), Wesley Woods Center of Emory University, Inc. (WWC), and Clifton Casualty Insurance Company, Ltd. (CCIC). EUH, EUHM, EJCH, ESJH, ERH, DMC, and DHR are sometimes referred to herein, collectively, as "the Hospitals." On September 1, 2018, Emory Healthcare became the sole and controlling member of DeKalb Regional Health System (DRHS) and its affiliates upon acquisition of DRHS' assets and liabilities. DMC, DHR, DMCF, and Ventures are the affiliates that account for DRHS' operations, assets, and liabilities. DMC operates a 451-bed general acute care hospital with a freestanding surgery center in Decatur, Georgia and a 100-bed general acute care hospital in Hillandale, Georgia. DRHS has been integrated operationally, financially, and clinically into Emory Healthcare since September 1, 2018, and the results of DRHS' operations have been included in the consolidated financial statements since that date.

The consolidated financial statements include the University and all other entities in which Emory has significant financial interest and control. All significant interentity accounts and transactions have been eliminated in consolidation.

(2) Summary of Significant Accounting Policies

The following significant accounting policies are used in the preparation of the accompanying consolidated financial statements:

The consolidated financial statements have been prepared on the accrual basis in conformity with U.S. generally accepted accounting principles (GAAP).

Net assets and revenue, gains, and losses are classified based on the existence or absence of externally imposed restrictions. Accordingly, net assets of the University are classified and reported as follows:

Net assets without donor restrictions – Net assets that are not subject to donor-imposed stipulations

Net assets with donor restrictions – Net assets that are subject to donor-imposed stipulations that will or may be met either by actions of the University and/or the passage of time. These net assets include donor-restricted endowments, unconditional pledges, split-interest agreements, and interests in perpetual trusts held by others. Generally, the donors of these assets permit the University to use all or part of the income earned and net appreciation on related investments for general or specific purposes.

Revenue is reported as increases in net assets without donor restrictions unless their use is limited by donor-imposed restrictions. Expenses are reported as decreases in net assets without donor restrictions. Gains and losses on investments and other assets or liabilities are reported as increases or decreases in net assets without donor restrictions unless their use is restricted by explicit donor stipulation or by law. Expirations of restrictions on net assets (i.e., the donor-stipulated purpose has been fulfilled and/or the stipulated time period has elapsed) are reported as net assets released from restrictions and shown as reclassifications among the applicable classes of net assets.

The University considers the following items to be nonoperating activities: gifts and contributions for capital and long-term investment and the related net assets released from restrictions, investment return in excess of spending distribution for current operations, change in fair value of derivative instruments, pension- and postretirement-related changes and net periodic benefit cost other than service cost, and other activities, net.

AUGUST 31, 2020 AND 2019

(a) Cash, Cash Equivalents, and Restricted Cash

Cash and cash equivalents consist primarily of bank balances and short-term money market mutual funds and treasury bills with original maturities generally 90 days or less that are not invested as part of the long-term investment assets. These amounts are carried at cost, which approximates fair value. Cash and cash equivalents that are part of the long-term pool are shown within investments as those funds generally are not used for daily operating purposes. Restricted cash consists of cash on hand that is restricted for a specific purpose under various capital financing arrangements or cash held for others and, therefore, not available to Emory for immediate or general business use. Restricted cash appears separately from the cash and cash equivalents on the University's consolidated statements of financial position.

The following table is a reconciliation of cash, cash equivalents, and restricted cash reported within the accompanying consolidated statements of financial position that sum to the total of the same such amounts shown in the accompanying consolidated statements of cash flows as of August 31 (in thousands):

		2020	2019
Cash and cash equivalents	\$	1,368,050	\$ 229,414
Restricted cash included in investments	3	13,362	17,567
Restricted cash included in prepaid expenses, deferred charges, and other assets		85,901	27,980
Total cash, cash equivalents, and restricted cash	\$	1,467,313	\$ 274,961

Fiscal year 2020 cash, cash equivalents, and restricted cash is favorably impacted primarily by strategic realignment of operating investments to increase liquidity as well as CARES Act funding received.

(b) Contributions Receivable, Net

Contributions to be received after one year, net of an allowance for uncollectible amounts are discounted to their present value at credit-adjusted rates. Amortization of discounts is recorded as additional contribution revenue. An allowance for uncollectible contributions receivable is provided based on management's judgment, considering such factors as prior collection history, type of contribution, relationship with donor, and other relevant factors.

(c) Loans Receivable, Net

Emory-funded loans to students are carried at estimated net realizable value. Loans receivable from students under certain government loan programs, carried at cost, can only be assigned to the federal government or its designees. In addition to federal direct loans (which are not reported in the consolidated financial statements), loans to qualified students are funded principally with government advances to Emory under the Perkins, Nursing, and Health Professions Student Loan Programs.

(d) Other Receivables, Net

Other receivables are recorded at net realizable value and include receivables under grants and contracts, medical services provided to other organizations, and losses recoverable from reinsurers.

(e) Investments

Investments are reported at fair value. Investments in securities and listed funds are valued using quoted prices in active markets if available; otherwise, if the market is inactive, fair value is determined by the University in accordance with its valuation policy.

Investments in alternative investment fund structures are valued using the net asset value (NAV) per share of the investment (or its equivalent), as a practical expedient, if (a) the underlying investment manager's calculation of NAV is fair value based and (b) the University does not currently have plans to sell the investment for an amount different from NAV. Valuations provided by the general partners and investment managers are evaluated by the Emory Investment Management Office and are believed to present reasonable estimates of fair value at August 31, 2020 and 2019.

Investments are exposed to several risks, which may include (but are not limited to) interest rate, liquidity, currency, market, and credit risks. The University attempts to manage these risks through diversification, ongoing due diligence of fund managers, and monitoring of economic conditions, though it is at least reasonably possible that changes in the values of investments will occur in the near term and that such changes could materially affect the amounts reported in the University's consolidated financial statements.

Investment transactions are accounted for on the trade-date basis. Dividend income is recognized on the ex-dividend date, and interest income is recognized on the accrual basis. Investment return, including realized and unrealized gains and losses, is recognized when earned and reported in the consolidated

AUGUST 31, 2020 AND 2019

statements of activities net of external and direct internal investment expenses. Investment return, if restricted, is reported in the consolidated statements of activities as increases or decreases in net assets with donor restrictions until amounts have been appropriated and the donor-imposed or statutory time restrictions have been satisfied.

(f) Fair Value Measurements

Fair value measurements reflected in the consolidated financial statements represent the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction among market participants at the measurement date. GAAP provides a hierarchy that prioritizes the inputs to fair value measurements based on the extent to which inputs to valuation techniques are observable in the marketplace. The hierarchy assigns a higher priority to observable inputs that reflect verifiable information obtained from independent sources and a lower priority to unobservable inputs that would reflect the University's assumptions about how market participants would value an asset or liability based on the best information available. Fair value measurements must maximize the use of observable inputs and minimize the use of unobservable inputs.

Assets and liabilities measured and reported at fair value are classified and disclosed within one of the following categories:

Level 1 – Valuations for assets and liabilities traded in active exchange markets as of the reporting date; valuations are obtained from readily available pricing sources for market transactions involving identical assets or liabilities

Level 2 – Valuations are determined through direct or indirect observations other than quoted market prices. The type of investments in Level 2 also includes certain positions in which the University is a unit of account holder within a fund or account that holds underlying assets that are traded in active exchange markets with readily available pricing.

Level 3 – Valuations for assets and liabilities that are unobservable and derived from other valuation methodologies, including discounted cash flow models and similar techniques, and not based on market exchange, dealer, or broker-traded transactions; Level 3 valuations incorporate certain assumptions and projections in determining the fair value assigned to such assets or liabilities.

In the event changes in the inputs used in the fair value measurement of an asset or liability result in a transfer of the fair value measurement to a different categorization, such transfers between fair value categories are recognized at the end of the reporting period.

(g) Split-Interest Agreements

The University's split-interest agreements with donors consist primarily of gift annuity agreements and irrevocable charitable remainder trusts for which the University serves as trustee. Assets held in the trusts are included in investments. Contribution revenue is recognized when trusts (or annuity agreements) are established, after recording liabilities for the present value of the estimated future payments to be made to beneficiaries. The liabilities are adjusted annually for changes in the value of assets, accretion of the discount, and other changes in the estimates of future benefits.

(h) Interests in Perpetual Funds Held by Others

The University is also the beneficiary of certain perpetual funds held and administered by others. The value of the funds' net assets (or Emory's share when there are other beneficiaries) is considered a reasonable estimate of the present value of the estimated future cash flows from these funds and is recognized in beneficial interest in perpetual funds and as contribution revenue at the date such funds are established. The largest fund of this type primarily holds shares of common stock of The Coca-Cola Company. The carrying value of Emory's interest in such perpetual funds is adjusted annually for changes in fair value.

(i) Property and Equipment, Net

Land, buildings, and equipment are recorded at cost at the date of acquisition or fair value at the date of gift to the University. Depreciation expense is based on the straight-line method over the estimated useful lives of the assets. Useful lives are as follows: buildings – 10 to 60 years, land improvements and infrastructure – 5 to 40 years, movable equipment – 3 to 20 years, fixed equipment – 3 to 30 years, software and enterprise systems – 3 to 10 years, leasehold improvements – term of the lease, and library books – 10 years. Certain assets totaling \$114.9 million and \$112.2 million, such as art, museum assets, and rare books, are included in property and equipment, net as of August 31, 2020 and 2019, respectively, but are not depreciated.

Property and equipment are reviewed for recoverability whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss shall be recognized only if the carrying amount of a long-lived asset is not recoverable and exceeds its fair value. The carrying amount of a long-lived asset is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and

AUGUST 31, 2020 AND 2019

eventual disposition of the asset. There were no asset impairments for fiscal years 2020 or 2019.

(i) Net Tuition and Fees

Tuition and fees revenue is derived from degree programs and continuing education programs. Most undergraduate students receive institutional financial aid based upon academic promise and demonstrated financial need. Graduate students often receive tuition support in connection with research assistant, teaching assistant, and fellowship appointments. Student financial aid provided by the University for tuition and fees is reflected as a reduction of tuition and fees revenue from published rates.

(k) Health Insurance Plan

The University is self-insured for employee and student health insurance costs, with losses insured in excess of a maximum amount on both a per claim and annual aggregate claim amount. The self-insurance liability is based on claims filed and an estimate of claims incurred but not yet reported. Self-insurance claims are reported as net of insurance premiums collected from employees and students.

(1) Gifts and Contributions Revenue

Contributions, including unconditional promises to give, are recognized as revenue in the period received. Unconditional promises to give, with payments due in future periods, are recorded as increases in net assets with donor restrictions at the estimated present value of future cash flows, net of an allowance for uncollectible pledges. Contributions of assets other than cash are recorded at their estimated fair value at the date of the gift.

Donor-restricted contributions are reported as revenue with donor restrictions, which increases this net asset class. If the donor stipulation is met in the year of the gift, the contribution is reflected in net assets without donor restrictions. Restrictions on gifts to acquire long-lived assets are considered met in the period when the asset is placed in service. Conditional promises to give are not recognized until they become unconditional; that is, when the barriers on which they depend are met.

(m) Grants and Contracts Revenue and Indirect Cost Recoveries

Funding from the federal government, corporations, or private foundations (sponsors) is recorded as grants and contracts revenue when it is for a specified activity with a defined budget, period of performance, and scope of work undertaken by the University. The agreement with the sponsor may take the form of a contract, grant, or cooperative agreement and is generally in

direct support of the University's mission. Sponsored program revenue and program income are earned when the University has substantially met its obligations and when the contractual performance measures have been completed. Revenue is recognized when services are rendered, milestones are met, or qualifying expenses are incurred as specified in the terms and conditions of the agreements, not necessarily when payments are received. Unearned revenue results when cash is received from sponsors in advance of revenue being earned. Unearned revenue is recorded as a liability (deferred revenue) until it is earned. Amounts recorded in grants and contracts receivable are for services rendered or expenditures incurred in advance of the receipt of funds.

Indirect cost recoveries are based on negotiated rates with grantor agencies and represent recoveries of facilities and administrative costs incurred under grants and contracts agreements.

(n) Net Patient Service Revenue

Net patient service revenue is reported at the estimated net realizable amounts due from patients, third-party payors, and others for services rendered, including estimated retroactive adjustments due to future audits, reviews, and investigations. Retroactive adjustments are considered in the recognition of revenue on an estimated basis in the period the related services are rendered, and such amounts are adjusted in future periods as adjustments become known or as years are no longer subject to such audits, reviews, and investigations. Emory Healthcare's estimates in this area may differ from actual experience, and those differences may be material.

The Hospitals reserve for third-party payor cost report audits and anticipated settlements through initial audit and final settlement of the cost reports. The Hospitals maintain estimates of third-party settlements for the Hospitals' routine exposures in this area in recognition of the complexity of relevant reimbursement regulations and the volatility of related settlement processes.

(o) Sales and Services of Auxiliary Enterprises and Independent Operations

An auxiliary enterprise is a nonacademic entity that exists predominantly to furnish goods and services to students, faculty, and staff. Auxiliary enterprises include residential halls, a bookstore, and parking operations. Fee charges are directly related to the costs of services provided.

Independent operations are activities that are solely owned and/or controlled by the University but are unrelated or independent of its mission. Independent operations include an externally

AUGUST 31, 2020 AND 2019

managed conference center, hotel, and a fitness center. Fee charges are based on market rates for the services provided.

(p) Leases

The University determines whether an arrangement is a lease (operating or finance) at inception by evaluating whether the contract conveys the right to use an identified asset and whether Emory obtains substantially all of the economic benefits from and has the right to control the asset. Right-of-use (ROU) assets represent the University's right to use an underlying asset for the lease term and lease liabilities represent the University's obligation to make lease payments arising from the lease. Operating and finance lease ROU assets and liabilities are recognized at the lease commencement date based on present value of the lease payments over the lease term discounted using the interest rate implicit in the lease agreement or Emory's relevant incremental borrowing rate. The University's current discount rates range from 0.47% to 4.52% depending on the term of the arrangement.

(q) Income Taxes

The University is recognized as a tax-exempt organization as defined in Section 501(c)(3) of the U.S. Internal Revenue Code of 1986, as amended (the Code) and is generally exempt from federal income taxes on related income pursuant to Section 501(a) of the Code. The University is, however, subject to federal and state income tax on unrelated business income.

In December 2017, the Tax Cuts and Job Acts (the Act) was approved by the U.S. Congress. Among other things, the Act imposes an excise tax on net investment income for certain organizations and establishes new rules for calculating unrelated business income. Emory has adopted the relevant positions of the Act based on reasonable estimates under the currently available regulatory guidance on the Act and there was no material impact on the consolidated financial statements.

The University regularly evaluates its tax positions and as of August 31, 2020 and 2019, there were no material uncertain tax positions.

(r) Derivative Instruments

Certain investment strategies used by the University and its investment managers incorporate various derivative financial instruments in order to reduce volatility, manage market risk, and enhance investment returns. Such instruments are reflected at fair value and included in investments. Changes in the fair value of investment-related derivative instruments are included in

investment return in excess of spending distribution for current operations on the consolidated statements of activities. The University utilizes interest swap agreements to hedge interest rate market exposure of variable rate debt. The difference between amounts paid and received under such agreements is reported in interest expense. Changes in the fair value of these swap agreements are recognized as nonoperating activities in the consolidated statements of activities.

(s) Pension and Postretirement Benefit Plans

The University recognizes the funded status of its defined-benefit pension and postretirement benefit plans as an asset or liability and recognizes changes in funded status during the year in which the changes occur as changes in net assets without donor restrictions.

(t) COVID-19 Pandemic

In March 2020, the World Health Organization declared the novel coronavirus (COVID-19) a pandemic. The COVID-19 pandemic has resulted in financial loss, stress, and hardship for many. The U.S. Congress passed the Coronavirus Aid, Relief, and Economic Security (CARES) Act, to help individuals and businesses affected by the pandemic and economic downturn. Government orders suspending elective surgical procedures have had an adverse effect on the operations of healthcare providers, including Emory Healthcare, primarily due to reduction in overall patient volumes.

Under the provision of the CARES Act, Emory Healthcare received approximately \$219.2 million in provider relief funds (PRF) from the Department of Health and Human Services (HHS) for both general and targeted distributions. Such funding is accounted for as a conditional contribution and is recognized in revenue once the applicable terms and condition have been met. According to the HHS guidance released September 19, 2020, the measurement date to determine the amount of funding to be recognized in revenue is December 31, 2020. Accordingly, the amounts are recorded as refundable advances in CARES Act accrued liabilities in the accompanying 2020 consolidated statement of financial position. As of the measurement date, Emory will evaluate revenue recognition for all or a portion of the \$219.2 million currently recorded as an accrued liability. The University, on behalf of one of its physician practice plans, received \$0.9 million in PRF, which was recognized as revenue in fiscal year 2020.

Emory Healthcare also received approximately \$285.2 million in advance payments from the Centers for Medicare and Medicaid

AUGUST 31, 2020 AND 2019

Services (CMS) to provide necessary funds when there is a disruption in claims submissions and processing or in circumstances such national emergency or natural disasters in order to accelerate cash flow to impacted healthcare providers. These advances are reflected in CARES Act accrued liabilities in the accompanying 2020 consolidated statement of financial position.

In August 2020, the University received \$4.0 million from the Department of Education pursuant to the institution's Certification and Agreement for Emergency Financial Aid Grants to Students that is included in CARES Act accrued liabilities in the accompanying 2020 consolidated statement of financial position. In alignment with the Department of Education guidance, Emory distributed the relief funds to Title IV aideligible students in September 2020. Emory received the institutional portion of the relief funds in September 2020, and elected also to provide these funds to students.

The CARES Act allows employers to defer deposits and payments of the employer's share of Social Security taxes incurred between March 27, 2020 and December 31, 2020. Emory has deferred payment of \$67.4 million of employer taxes that are included in CARES Act accrued liabilities in the accompanying 2020 consolidated statement of financial position. Fifty percent of the deferred tax amount must be paid by December 31, 2021, with the remainder by December 31, 2022.

Commencing March 13, 2020, undergraduate and graduate course education was conducted virtually, and most students vacated the campus. The University granted refunds and additional aid to students totaling \$16.9 million in fiscal year 2020 for housing, dining, parking, and other services not provided after March 13, 2020. Students continued to meet their academic requirements for the remainder of the 2019–20 academic year. While some faculty and staff are working oncampus to ensure continuity of essential operations, most faculty and staff have transitioned to remote work.

Emory established a \$5.0 million EmoryTogether Fund to support undergraduate, graduate, and professional students of various income levels and backgrounds who incurred financial hardships as a result of COVID-19 pandemic.

The University's pandemic response plan has multiple facets and continues to evolve as the pandemic unfolds. Management initiated steps to ensure operational and functional flexibility in order to offset the increased expenditures due to COVID-19 pandemic, including the following:

- Temporarily paused existing routine capital projects and reduced routine budgeted capital expenditures for 2021; and
- Enhanced certain cost cutting measures.

The continued spread of COVID-19 and its impact on social interaction, travel, economies, and financial markets may adversely affect the University's operations and financial condition.

(u) New Accounting Pronouncements

In February 2016, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2016-02, Leases (Topic 842). The University adopted ASU No. 2016-02, as amended, using the optional transition method, effective September 1, 2019. The adoption of this ASU resulted in the initial recognition of operating lease ROU assets and liabilities of approximately \$238.9 million on the accompanying 2020 consolidated statement of financial position and the reclassification of approximately \$18.2 million of assets and liabilities that were previously presented on the consolidated statements of financial position as capital leases and under Topic 842 as finance lease ROU assets and liabilities. As permitted by ASU No. 2016-02, for a short-term lease with a term of 12 months or less without a purchase option that the University is likely to exercise, Emory has elected not to recognize lease assets and liabilities.

In November 2016, the FASB issued ASU No. 2016-18, Statement of Cash Flows (Topic 230) — Restricted Cash, to add or clarify classification and presentation of restricted cash in the statement of cash flows. This update requires the amounts generally described as restricted cash and restricted cash equivalents to be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the statement of cash flows. This ASU is effective for the fiscal year ended August 31, 2020. The University adopted ASU No. 2016-18 in fiscal year 2020, retrospectively to fiscal year 2019.

In March 2017, the FASB issued ASU No. 2017-07, *Improving the Presentation of Net Periodic Pension Cost and Net Periodic Benefit Cost (Topic 715)*, which requires the University to present the service cost component of net benefit cost within operating expenses and all other components of net benefit cost, such as interest, gains or losses, and amortization of other actuarially determined amounts, in nonoperating activities. The University adopted ASU No. 2017-07 in fiscal year 2020 with retrospective changes to the August 31, 2019 financial statements.

AUGUST 31, 2020 AND 2019

In August 2018, the FASB issued ASU No. 2018-13, Fair Value Measurement: Disclosure Framework – Changes to the Disclosure Requirements for Fair Value Measurement (Topic 820). ASU No. 2018-13 eliminates, modifies, and adds certain disclosures on fair value measurements. ASU No. 2018-13 is effective for fiscal periods beginning after December 15, 2019. Emory is evaluating the effect of adoption on its consolidated financial statements beginning in FY 2021.

(v) Use of Estimates

The preparation of the consolidated financial statements in conformity with GAAP requires that management make estimates and assumptions affecting the reported amounts of assets, liabilities, revenue, and expenses, as well as disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Significant items in the University's consolidated financial statements subject to such estimates and assumptions include valuations for certain investments without readily determinable fair values, the determination of the allowances for price concessions for medical services, reserves for employee and student healthcare and workers' compensation claims, accrued professional and general liability costs, estimated third-party settlements, and actuarially determined benefit liabilities.

(w) Conflict of Interest Policies

University trustees, directors, principal officers, and key employees may periodically be directly or indirectly associated with companies doing business with the University. The University requires annual disclosure of significant financial interests in, or employment or board service with, entities doing business with the University. The annual disclosures cover these key officials and their immediate family members.

When such relationships exist, measures are taken to appropriately manage the actual or perceived conflict. The written conflict of interest policy for the University requires, among other things, that no member of a governing board may participate in any decision in which he or she (or an immediate family member) has a material financial interest.

(3) Contributions Receivable

Contributions receivable as of August 31 consist of the following (in thousands):

	2020	2019
UNCONDITIONAL PROMISES EXPECTED TO BE COLLECTED IN:		
Less than one year	\$ 122,430	\$ 164,414
One year to five years	42,804	35,094
Over five years	4,787	3,973
Gross contributions receivable	170,021	203,481
Less:		
Allowance for uncollectible amounts	(4,861)	(5,497)
Discount to present value	(4,731)	(4,192)
Contributions receivable, net	\$ 160,429	\$ 193,792

At August 31, 2020 and 2019, the five largest outstanding donor pledge balances represented 74% and 73%, respectively, of Emory's gross contributions receivable. Contributions receivable are discounted at rates ranging from 3.87% to 4.25%.

As of August 31, 2020, the University had received bequest intentions and conditional promises of approximately \$56.7 million. These intentions to give are not recognized as assets or revenue and, if received, will generally be restricted for purposes stipulated by the donor.

(4) Patient Accounts Receivable and Credit Concentrations

Emory Healthcare grants credit to patients, substantially all of whom reside in the service areas. Emory Healthcare generally does not require collateral or other security in extending credit to patients; however, it routinely obtains assignment of (or is otherwise entitled to receive) patients' benefits payable under their health insurance programs, plans, or policies (e.g., Medicare, Medicaid, managed care, capitated, and other preferred provider arrangements and commercial insurance policies).

AUGUST 31, 2020 AND 2019

The composition of net receivables from patients and third-party payors for the years ended August 31 is as follows:

	2020	2019
Managed care and other third-party payors	55%	56%
Medicare	31	31
Medicaid	8	7
Patients	6	6
	100%	100%

(5) Revenue from Contracts with Customers

(a) Contracts with Customers

The University recognizes revenue, when its customers obtain control of promised goods or services, in an amount that reflects the consideration that the University expects to receive in exchange for those goods or services.

(b) Contract Balances

Accounts receivable are recorded only when the University's right to consideration is unconditional (i.e., the contract is noncancelable – generally after the expiration of a student withdrawal period).

Deferred revenue relates to payments received in advance of performance under contracts with customers. Emory invoices customers (i.e., students) for education and residential services and customers transfer consideration before the University has transferred promised goods or services to its customers. At each reporting date, Emory records all prepayment amounts associated with educational services that have not yet been delivered as deferred revenue.

The University records accounts receivable and related contract liabilities for noncancelable contracts with customers when there is a right to consideration.

(c) Significant Judgments

Emory applies the portfolio approach to educational and residential services (room and board) and to patient services due to the large volume of similar contracts and similar customer classes. Using the portfolio approach streamlines Emory's processes for collectibility assessment and refund estimation.

The University determined that the effect of applying this guidance to the portfolio does not differ materially from applying the guidance to the individual contracts within the portfolio. Emory considers education and residential service as separate and distinct performance obligations. Since students receive instruction and housing concurrently during the academic term, they simultaneously receive and use all the benefits that Emory provides in the performance of the contracts. Therefore, the performance obligations associated with academic programs are satisfied over time and revenue recognized as the related services are performed.

Tuition and fees are recognized in the fiscal year in which the academic programs and residential services are provided. Revenue is reflected in the consolidated statements of activities for the portion that is completed by the end of the fiscal year. The remaining performance obligation that will be completed in the following fiscal year remains a liability on the consolidated statements of financial position.

Emory provides institutionally funded grants and scholarships to students, who either demonstrate financial need or qualify academically, as a form of price reduction up to and equal to amounts owed by students to the University. Institutional resources provided in excess of amounts owed by the students to Emory are recorded as scholarship expenses. Students receive Title IV financial aid, state funds, and employer reimbursements. Emory accounts for the payment as a third-party payment on behalf of an identified customer to an existing exchange transaction, and therefore, the grant or loan amount does not reduce the transaction price.

Auxiliary enterprises revenue includes revenue from residential services, parking operations, bookstore, conference services offered by the University, ticket sales for events, and other miscellaneous activities, which furnish goods or services to students, faculty, staff, and, in some cases, to the general public. Within auxiliary enterprises, Emory considers parking service agreements to be distinct performance obligations that are billed to students in advance and payments due prior to the start of each academic term. Prepayments are reflected on the consolidated statements of financial position as deferred revenue and recognized as revenue ratably over the period during which the parking services are rendered. Sales of goods within auxiliary enterprises generally occur as a point of sale transaction, and the revenue is recognized as the sale occurs. Any discounts are factored into the selling price at the point of sale.

AUGUST 31, 2020 AND 2019

Emory considers revenue from clinical trial agreements to be exchange transactions where revenue is recognized as services are performed, billed, and the University has contractual right to consideration. Revenue related to clinical trial agreements included in grants and contracts revenue in the consolidated statements of activities for the years ended August 31, 2020 and 2019 totaled \$54.6 million and \$49.8 million, respectively.

The University recognizes revenue from nonrefundable, up-front fees allocated to a license at a point in time when the license is transferred to the licensee and the licensee is able to use and benefit from the license. For agreements that include sales-based royalties, including milestone payments based on the level of sales, and the license is deemed to be the predominant item to which the royalties relate, the University recognizes revenue when the related sales occur.

The University has contractual agreements with Grady Memorial Hospital where practicing interns and medical residents of the Emory School of Medicine receive clinical training and faculty provide teaching, medical care, and hospitalization services. The School of Medicine is reimbursed for expenses incurred for interns and medical residents based on the costs for labor and reimbursed for the faculty teaching, administrative, and clinical services based on the number of interns and residents trained and time spent performing clinical and administrative services. Medical services revenue is recognized as services are performed and the customer receives and uses the benefits of the services.

The University also has affiliation and administrative services agreements with Children's Healthcare of Atlanta and the Emory + Children's Pediatric Institute, where it provides various administrative services. Revenue is recorded as other revenue in the consolidated statements of activities as the University satisfies the performance obligation over time. The customer simultaneously receives and consumes the benefits as the University performs.

(d) Disaggregation of Student Revenue

The following table provides the components of tuition and fees and student-related auxiliary enterprises revenue for the year ended August 31, 2020 (in thousands):

	Tuition and Fees	Auxiliary Enterprises (1)	Total
Undergraduate programs	\$ 439,894	38,450	478,344
Graduate and professional programs	317,229	910	318,139
Total at published rates	757,123	39,360	796,483

Total tuition and fees and auxiliary enterprises	\$ 452,423	43,257	495,680

AUGUST 31, 2020 AND 2019

(6) Grants and Contracts

The University receives grants and contracts revenue from federal, state, corporate, and private sources. If resource providers do not receive commensurate benefit (only indirect benefit because the research findings serve the general public) in exchange and the results are maintained and can be used by the University, such grants and contracts are considered contributions.

Most Emory nonexchange, sponsored research agreements are conditional contributions as the agreements include both a right of return or release of assets and a barrier that Emory must overcome to be entitled to the consideration. These agreements become unconditional as barriers are satisfied. The University recognizes revenue associated with these sponsored agreements as qualifying allowable expenses are incurred or a measurable performance-related barrier is achieved in accordance with the terms and conditions of the agreements. Conditional contributions are recognized as deferred revenue if assets are transferred in advance or not recognized at all until the conditions have been substantially met or explicitly waived by the sponsoring entity, at which point the contributions are recognized as unconditional. Conditional agreements with sponsor-imposed restrictions that expire simultaneously with the satisfaction of the specified conditions are reported as net assets without donor restrictions.

The following table presents Emory's sources of grants and contracts revenue (including indirect cost recoveries) for the year ended August 31 (in thousands):

	2	2020	2019		
	Grants	Contracts with Customers	Grants	Contracts with Customers	
Federal government	\$ 500,823	1,021	\$ 479,084	2,292	
Other government	1,770	207	13,051	229	
Corporate	16,248	50,162	12,170	44,528	
Private institutions	93,884	3,209	89,272	2,747	
Total	\$ 612,725	54,599	\$ 593,577	49,796	

As of August 31, 2020 and 2019, Emory had unexpended grant awards of \$739.2 million and \$627.6 million, respectively, for which revenue will be recognized when conditions have been met or performance obligations have been satisfied.

(7) Net Patient Services Revenue

Emory Healthcare has agreements with government and other third-party payors that provide for reimbursement to Emory Healthcare at amounts different from established rates.

Revenue is recognized as performance obligations are satisfied. Performance obligations are determined based on the nature of the services provided. Revenue for performance obligations satisfied over time is recognized based on actual charges incurred in relation to total expected (or actual) charges. Emory Healthcare believes that this method provides a reasonable depiction of the transfer of services over the term of the performance obligation based on the inputs needed to satisfy the obligation. Generally, performance obligations satisfied over time relate to patients in Emory Healthcare's hospitals receiving inpatient, outpatient, or services. Emory Healthcare measures the performance obligation from admission, or the commencement of an outpatient service, to the point when it is no longer required to provide services to that patient, which is generally at the time of discharge or completion of the outpatient services. Revenue for performance obligations satisfied at a point in time is generally recognized when goods are provided to Emory Healthcare's patients and customers in a retail setting (e.g., pharmaceuticals), and Emory Healthcare does not believe it is required to provide additional goods or services related to that sale.

Emory Healthcare determines the transaction price based on standard charges for goods and services provided, reduced by contractual adjustments provided to third-party payors, discounts provided to uninsured patients in accordance with Emory Healthcare policy, and implicit price concessions provided to patients. Emory Healthcare determines its estimates of contractual adjustments and discounts based on contractual agreements, its discount policies, and historical experience. Emory Healthcare cannot pursue collections for the contractual or discount amounts; therefore, such amounts are not reported as revenue.

Emory Healthcare provides care to patients regardless of their ability to pay. Emory Healthcare has determined it has provided implicit price concessions to uninsured patients and patients with other uninsured balances (e.g., co-pays and deductibles).

AUGUST 31, 2020 AND 2019

The implicit price concessions included in estimating the transaction price represent the difference between amounts billed to patients and the amounts Emory Healthcare expects to collect based on its collection history with those patients considering business and economic conditions, trends in healthcare coverage, and other collection indicators. Periodically, management assesses the adequacy of the allowance for implicit price concessions based upon historical write-off experience by payor category and adjusts the reserve as appropriate.

Patient service revenue, net of contractual adjustments, implicit price concessions and other discounts recognized from major payor sources for the years ended August 31 is as follows (in thousands):

	2020	2019
Medicare	\$ 1,213,659	\$ 1,322,185
Medicaid	180,758	233,463
Other third-party payors	2,728,112	2,613,609
Patients	68,508	37,126
Net patient service revenue	\$ 4,191,037	\$ 4,206,383

The composition of net patient service revenue based on the Emory Healthcare lines of business for the years ended August 31 is as follows (in thousands):

	2020	2019
Services lines:		
Hospital – inpatient	\$ 1,876,358	\$ 1,781,251
Hospital – outpatient	1,407,373	1,421,988
Physician services	907,306	1,003,144
Net patient service revenue	\$ 4,191,037	\$ 4,206,383

(8) Charity Care and Community Benefits

Emory Healthcare provides care to patients who meet certain criteria under their charity care policies without charge or at amounts less than their established rates and such amounts are not included in net patient service revenue.

Records are maintained to identify and monitor the level of charity care provided. These records include the amount of charges foregone and actual costs for services furnished under its charity and indigent care policies. The cost of charity care provided totaled approximately \$130.3 million and \$151.5 million for the years ended August 31, 2020 and 2019, respectively. Emory Healthcare estimated these costs by applying a ratio of cost to gross charges to the gross uncompensated charges associated with providing care to the charity patients.

(9) Liquidity and Availability

Emory regularly monitors liquidity required to meet its operating needs and other contractual commitments, while also maximizing the investment of its available funds.

For purposes of analyzing resources available to meet general expenditures over a 12-month period, the University considers all expenditures related to its ongoing mission-related activities as well as the conduct of services undertaken to support those activities to be general expenditures.

In addition to financial assets available to meet general expenditures over the next 12 months, the University operates with a balanced budget and anticipates collecting sufficient revenue to cover general expenditures not covered by donor-restricted resources.

As of August 31, 2020 and 2019, the following financial assets could readily be made available within one year of the statements of financial position date to meet cash needs for general expenditures (in thousands):

	2020
TOTAL ASSETS	\$ 17,172,361
Less:	
Land, building, and equipment, net	(3,629,700)
Interest in perpetual trusts held by others	(1,670,377)
Donor-restricted and board-designated endowment funds	(5,889,384)
Other investments	(2,884,965)
Prepaid expenses, deferred charges, and other assets	(446,925)
Operating lease right-of-use assets	(212,499)
Contributions receivable, net	(160,429)
Loans receivable, net	(20,783)
Add:	
Endowment payout in following year	203,790
Contributions receivable due within one year for operations	122,430
Financial assets available to meet cash needs for general expenditures within one year	\$ 2,583,519

AUGUST 31, 2020 AND 2019

	2019
TOTAL ASSETS	\$ 15,024,872
Less:	
Land, building, and equipment, net	(3,502,052)
Interest in perpetual trusts held by others	(1,757,576)
Donor-restricted and board-designated endowment funds	(5,399,522)
Other investments	(2,174,895)
Prepaid expenses, deferred charges, and other assets	(319,591)
Contributions receivable, net	(193,792)
Loans receivable, net	(21,960)
Add:	
Endowment payout in following year	203,334
Contributions receivable due within one year for operations	164,414
Financial assets available to meet cash needs for general expenditures within one year	\$ 2,023,232

The University has \$2,583.5 million of financial assets as of August 31, 2020 to meet cash needs for general expenditures, consisting of cash of \$1,368.1 million, accounts receivable of \$885.5 million, contributions receivable, less than one year of \$122.4 million, payout on with and without donor-restricted endowment funds of \$203.8 million, and other operating investments of \$3.7 million.

As described further in note 16, to supplement working capital and other commitments, the University also has lines of credit.

AUGUST 31, 2020 AND 2019

(10) Investments

The following table summarizes investments as of August 31 (in thousands):

	2020		2019
Short-term investments and cash equivalents (a)	\$ 384,12	27 \$	181,658
Public equity (b)	3,663,83	3	3,079,796
Absolute return/fixed income (c) (g)	1,852,78	31	2,491,602
Private equity/venture capital (d)	2,196,03	3	1,786,917
Real assets (e)	650,83	8	731,062
Derivative instruments (f)	2,89	0	8,846
Total investments at fair value	8,750,50	2	8,279,881
Joint ventures (equity method)	27,58	36	2,524
Total investments	\$ 8,778,08	8 \$	8,282,405

- (a) Includes short-term U.S. and non-U.S. Treasury securities with maturities of less than one year, as well as funds that invest in these types of investments
- (b) Includes domestic and international stocks, as well as interests in funds that invest in both long only and long/short equity-based strategies; certain investments in funds may be subject to restrictions that limit the University's ability to withdraw capital until (i) certain "lock-up period" has expired or (ii) until certain underlying investments designated as "illiquid" or "side pockets" are sold. In addition, fund investments in this category may be subject to restrictions limiting the amount the University is able to withdraw as of a given redemption date.
- (c) Includes directly held actively traded global fixed-income securities (such as government bonds and corporate bonds) or commingled funds holding such securities of \$0.9 billion and \$1.38 billion and investments in multistrategy or credit funds as well as opportunistic absolute return funds intended to enhance diversification and reduce correlation to public equity of \$1.0 billion and \$1.11 billion as of August 31, 2020 and 2019, respectively; certain fund investments included in this category may hold marketable securities and be subject to redemption terms governed by the respective fund agreement or may contain illiquid investments and, therefore, offer no liquidity over the fund life. Such funds holding illiquid investments are expected to yield liquidating distributions over the next 6 years.
- (d) Includes illiquid investments in private and public companies, both domestically and internationally; the majority of these investments are held through funds and also include buyout, venture capital, high yield, and subordinated debt strategies. The nature of the investments in this category is such that distributions are received through liquidation of the underlying assets of the funds, which are expected to occur over the next 11 years.
- (e) Includes investments in oil and gas, commodities, timber, and real estate, the majority of which are held through commingled funds; the nature of the investments in this category is such that distributions are received through liquidation of the underlying assets of the funds, which are expected to occur over the next 12 years.
- (f) Includes investments in equity options, swaps, and forwards value at fair value of each underlying investments
- (g) Amounts presented net of \$7.2 million and \$244.0 million of net pending trade payables related to unsettled forward purchases and sales of such securities as of August 31, 2020 and 2019, respectively

AUGUST 31, 2020 AND 2019

As of August 31, 2020, the related unfunded commitments of the University's alternative investments valued using the practical expedient and limitations and restrictions on the University's ability to redeem or sell are summarized as follows (in thousands):

		Redemption	
		Frequency	
	Unfunded	(if currently	Redemption
	Commitments	eligible)	Notice Period
Absolute return	\$ 358,518	90-360 days or not eligible	90-306 days
Private equity/venture capital	800,945	not eligible	not eligible
Public equity	_	30-360 days	10-180 days
Real assets	408,170	not eligible	not eligible
_	\$ 1,567,633	•	

Unfunded commitments are expected to be called by funds within five years of fund inception.

(11) Endowment Net Assets

The University's endowed assets (the Endowment) consists of 2,108 individual funds established for a variety of purposes, including with donor restriction endowment funds and without donor restrictions funds designated by the Board of Trustees to function as endowments. The Endowment provides stable financial support to a wide variety of programs and activities in perpetuity, playing a critical role in enabling the University to achieve its mission. Net assets associated with these endowment funds are classified and reported based on the existence or absence of donor-imposed restrictions.

(a) Interpretation of Relevant Law

The Board of Trustees of the University has approved the University's adoption of the State of Georgia Uniform Prudent Management of Institutional Funds Act (UPMIFA), which provides standards for managing investments of institutional funds and spending from endowments. The University classifies as donor-restricted historical value net assets (a) the original value of gifts donated to the permanent endowment, (b) the original value of subsequent gifts to the permanent endowment, and (c) accumulations to the permanent endowment made in accordance with the direction of the applicable donor gift instrument at the time the accumulation is added to the fund.

The remaining portion of the donor-restricted endowment fund that is classified as restricted appreciation until those amounts are appropriated for expenditures by the University in a manner consistent with the standard of prudence prescribed by UPMIFA. In accordance with UPMIFA, the University considers several factors in making a determination to appropriate or accumulate donor-restricted endowment funds, including the duration and preservation of the fund, the purposes of the fund, general economic conditions, the possible effect of inflation and deflation, the expected total return from income and the appreciation of investments, other resources of the University, and the investment policies of the University.

The endowment funds subject to UPMIFA are true endowments and do not include perpetual funds held by others, long-term investments, annuity funds, funds held in trust for others, and miscellaneous investments. As of August 31, 2020, approximately 67.1% of the investments described in note 10 are classified as endowed net assets.

Endowment funds are categorized in the following net asset classes as of August 31 (in thousands):

		2020			2019	
	Without Donor	With Donor		Without Donor	With Donor	
	Restrictions	Restrictions	Total	Restrictions	Restrictions	Total
Donor-restricted endowment funds						
Appreciation	\$ -	3,167,571	3,167,571	\$ -	2,845,925	2,845,925
Historical value	_	988,755	988,755	_	950,730	950,730
Total donor restricted	-	4,156,326	4,156,326	_	3,796,655	3,796,655
Funds functioning as endowments or board-designated	1,733,058	_	1,733,058	1,602,867	-	1,602,867
Total endowment net assets	\$ 1,733,058	4,156,326	5,889,384	\$ 1,602,867	3,796,655	5,399,522

AUGUST 31, 2020 AND 2019

The following table represents endowment net asset composition by purpose as of August 31 (in thousands):

			2020				2019	
		Without Donor	With Donor			Without Donor	With Donor	
		Restrictions	Restrictions	Total		Restrictions	Restrictions	Total

alance as of August 31, 2020	\$ 1,733,058	4,156,326	5,889,38

(b) Funds with Deficiencies

From time to time, the fair value of assets associated with individual donor-restricted endowment funds may fall below the level of the donor's original contribution. No significant deficiencies of this nature are reported in net assets with donor restrictions.

(c) Return Objectives and Risk Parameters

The University has adopted investment and spending policies for endowment assets that attempt to provide a predictable stream of funding to programs supported by its endowment and seek to maintain the purchasing power of the endowment assets. Under this policy, as approved by the Board of Trustees, the endowment assets are invested within risk tolerances of the University to

AUGUST 31, 2020 AND 2019

provide an expected total return in excess of spending and inflation over the long term.

(d) Strategies Employed for Achieving Objectives

To satisfy its long-term return objectives, the University relies on a total return strategy in which investment returns are achieved through both capital appreciation (realized and unrealized) and current yield (interest and dividends). The University employs a diversified asset allocation strategy across public equity, absolute return/fixed income, private equity/venture capital, real assets, and derivative instruments to achieve its long-term return objectives within a prudent risk framework. The Endowment's long-term target asset allocation is approved by the Investment Committee of the Board of Trustees. The portfolio is periodically rebalanced to the target weightings for each asset class.

(e) Relationship between Investment Objectives and Spending Policy

The University's Board of Trustees has established a spending policy that determines how endowment distributions are made. The University employs a total return endowment spending policy that establishes the amount of endowment investment return available to support current operating and capital needs. The distribution of endowment investment return in 2020 and 2019 was based on 4.75% of the average fair value of the endowment over the previous 12 months ended on August 31. The University considers the expected return on its endowment, including the effect of inflation in setting the annual appropriation amount. Accordingly, the University expects the current spending policy to allow its endowment to maintain its purchasing power will be provided through new gifts and any excess investment return. The payout rate is approved annually by the Board of Trustees as part of the budget process.

(12) Fair Values of Assets and Liabilities

The following table summarizes the valuation of the University's assets and liabilities according to the fair value hierarchy levels as of August 31, 2020 (in thousands):

				Fa	ir Value Hierarchy	
	Т	otal Fair Value	Investments Measured at NAV (2)	Level 1	Level 2	Level 3

AUGUST 31, 2020 AND 2019

(13) Derivative Instruments and Hedging Activities

(a) Investments

Investment strategies employed by Emory and investment managers retained by Emory may incorporate futures, options, swaps, and other derivative instruments to adjust elements of investment exposures to various securities, markets, and currencies without taking a position in the underlying assets. These instruments expose Emory to risk of an unexpected movement in the fair value of the underlying security, a counterparty failing to meet its obligations, and, in certain circumstances, not being able to unwind a position at current fair value due to market illiquidity. Emory has established procedures to monitor and manage these risks.

Emory's investment-related derivative exposures, categorized by primary underlying risk, as of and for the years ended August 31 are as follows (in thousands):

2020		ional Amount (1)	Asset Fair Value	Liability Fair Value	Total Earnings (2)	
Interest-rate contracts	\$	-	-	-	2,974	
Foreign exchange contracts		27	14	(14)	1,690	
Equity contracts (3)		133,704	14,288	(11,398)	(19,418)	
Credit contracts		_	_	_	(74)	
Total (4)	\$	133,731	14,302	(11,412)	(14,828)	

2019		tional Amount (1)	Asset Fair Value	Liability Fair Value	Total Earnings (2)	
Interest-rate contracts	\$	759,465	305	(7,427)	(8,563)	
Foreign exchange contracts		1,352,696	662	(956)	4,007	
Equity contracts (3)		220,797	31,347	(14,954)	14,133	
Credit contracts		28,962	364	(495)	10	
Total (4)	\$	2,361,920	32,678	(23,832)	9,587	

- (1) The notional amount is representative of the absolute value of the open contracts as of August 31, 2020 and 2019, except as otherwise discussed below in (3).
- (2) Gains (losses) on derivative instruments incurred during the fiscal year are included in the consolidated statements of activities in investment return in excess of spending distribution for current operations in nonoperating activities.
- (3) The notional value for options is presented on a net delta-adjusted basis.
- (4) Derivatives are held primarily with two counterparties. No cash collateral is pledged or held as of August 31, 2020 and \$6.0 million as of August 31, 2019.

(b) Debt

As a component of the debt portfolio, the University entered into interest rate swap agreements that effectively convert a portion of variable rate debt to fixed rates and are used to manage interest rate risk. The University's exchange arrangements are exposed to credit loss in the event of nonperformance by the counterparty and to interest rate risk driven by any potential basis risk with variable rate debt. Certain of the University's derivative instruments contain provisions requiring long-term, unsecured debt to be maintained at specified credit ratings from Moody's Investors Service and Standard and Poor's Ratings Service. If the ratings of the University's debt were to fall below certain benchmarks, the counterparty could request immediate payment on derivative instruments in net liability positions. At August 31,

2020, the University's long-term debt ratings exceeded these benchmarks.

At August 31, 2020, Emory had eight interest rate swap agreements expiring on various dates ranging from September 1, 2035 through December 1, 2042. These agreements require Emory to pay fixed interest rates to the counterparties varying from 3.238% to 3.607% in exchange for variable rate payments from the counterparties based on a percentage of the three-month LIBOR.

Net settlement transactions related to the agreements described above resulted in interest expense totaling \$12.3 million and \$10.6 million during 2020 and 2019, respectively. The fair value of each exchange agreement is estimated based on pricing models that utilize significant observable inputs, such as relevant current

AUGUST 31, 2020 AND 2019

interest rates, that reflect assumptions on the amount the University would receive or pay to terminate the agreement at the reporting date. As such, the University's exchange agreements are categorized as Level 2 in the fair value hierarchy.

The aggregate fair value of all derivative instruments with credit risk-related contingent features that are in a liability position was \$271.0 million and \$238.1 million, collateralized by \$85.9 million and \$28.0 million of cash on August 31, 2020 and 2019, respectively. Collateral postings are reported in prepaid expenses, deferred charges, and other assets in the consolidated statements of financial position.

The following table summarizes the debt-related derivative instruments as of August 31 (in thousands):

Interest Rate Swaps			2020 2019				9
Inception	Maturity	Notional Amount (2)	Liability Fair Value	Unrealized Loss	L	iability Fair Value	Unrealized (Loss) Gain
August 4, 2005	September 1, 2035	\$ 125,000	(44,378)	(5,951)	\$	(38,427)	(18,110)
August 25, 2005	September 1, 2035	40,000	(15,030)	(2,066)		(12,964)	(6,106)
April 19, 2007 (1)	November 15, 2028	_	=	=		=	991
December 1, 2007	September 1, 2035	75,000	(31,227)	(3,726)		(27,501)	(12,049)
May 1, 2008	September 1, 2038	75,000	(37,097)	(3,587)		(33,510)	(14,327)
December 1, 2008	December 1, 2042	100,000	(52,107)	(7,376)		(44,731)	(22,137)
December 1, 2009	September 1, 2035	75,000	(31,585)	(3,097)		(28,488)	(12,193)
June 23, 2015	September 1, 2035	125,000	(44,522)	(5,281)		(39,241)	(18,924)
June 23, 2015	September 1, 2035	40,000	(15,030)	(1,780)		(13,250)	(6,396)
Total	•	\$ 655,000	(270,976)	(32,864)	\$	(238,112)	(109,251)

- (1) Interest rate swap terminated on April 11, 2019
- (2) The notional amount is the predetermined dollar amount on which the exchanged interest payments are based.

Emory is exposed to financial loss in the event of nonperformance by a counterparty to any of the financial instruments described above. General market conditions could impact the credit standing of the counterparties and, therefore, potentially impact the value of the instruments. Emory management, with consultation from third-party financial advisers, controls this counterparty credit risk by considering the credit rating, business risk, and reputation of any counterparty before entering into a transaction, monitoring for any change in the credit standing of its counterparty during the life of the transaction, and requiring collateral be posted when predetermined thresholds are crossed. The swaps are exchanged with five counterparties.

(14) Property and Equipment, Net

Property and equipment, net as of August 31 is summarized as follows (in thousands):

	2020	2019
Land and improvements	\$ 241,771	\$ 241,771
Buildings and improvements	3,963,022	3,888,388
Equipment	2,824,581	2,677,517
Finance lease ROU assets (Note 15)	20,820	-
Library and museum assets	483,366	460,960
Construction in progress	300,607	171,332
	7,834,167	7,439,968
Less: accumulated depreciation	(4,200,109)	(3,937,916)
Less: accumulated amortization of finance leases	(4,358)	_
Total property, plant, and equipment, net	\$ 3,629,700	\$ 3,502,052

AUGUST 31, 2020 AND 2019

The University has identified asset retirement obligations predominantly from commitments to remove asbestos and lead paint in the University's facilities at the time of major renovation or demolition. The liability was estimated using an inflation rate of 5.00% and discount rate of 4.74%. The liability for asset retirement obligations at August 31, 2020 and 2019 is \$82.6 million and \$79.1 million, respectively.

(15) Leases

The University has operating and finance leases for office buildings, research and development facilities, hospital and educational buildings, and certain equipment. Leases have remaining lease terms of 1 year to 25 years, some of which include purchase options or options to extend the leases.

Operating leases are included in operating lease right-of-use assets and operating lease liabilities in the 2020 consolidated statement of financial position. Finance leases are included in property, plant, and equipment, net and finance lease liabilities in the 2020 consolidated statement of financial position. Operating lease ROU assets include any lease payments made and exclude lease incentives. Renewal options are excluded from the calculation of lease liabilities unless it is reasonably assured that the renewal option will be exercised. Costs associated with operating lease ROU assets are recognized on a straight-line basis within operating expenses over the term of the lease.

Finance lease ROU assets are amortized within operating expenses on a straight-line basis over the shorter of the estimated useful lives of the assets or the lease term. The interest component of a finance lease is included in interest expense and recognized using the effective interest-method over the lease term. Variable lease costs, such as common area maintenance, property taxes, and insurance are expensed as incurred.

Emory has lease agreements with lease and nonlease components. The University elected a practical expedient, primarily for its copier leases, whereby nonlease components are not separated from the lease component. This results in all of the lease and nonlease components being combined, and accounted for, as a single lease component. In electing the practical expedient both the lease and nonlease components are included in the measurement of the ROU assets and lease liabilities.

The components of lease expense for the year ended August 31, are as follows (in thousands):

	2020
Finance lease cost	\$ 7,881
Amortization of right-of-use assets	4,358
Interest on lease liabilities	3,523
Operating lease cost	41,977
Short-term lease cost	15,963
Total lease expense	\$ 65,821

The University has entered into a lease for space to serve as an expanded point of entry for imaging and surgical cases for Emory Healthcare, referred to as the Muscoskeletal Outpatient Center (MSK Center) at its Executive Park property, which has not yet commenced as of August 31, 2020. The underlying asset is currently under construction, and although the University is involved in the design and construction, the University does not control the building during construction, and is thus not deemed to be the owner during construction. Construction of the building is anticipated to be substantially complete by September 1, 2021, at which time the University will obtain the right of use of the asset and the lease will commence.

Aggregate future payments under noncancelable operating and finance leases as of August 31, 2020 are as follows (in thousands):

	Ope	rating Leases	Finance Leases
2021	\$	43,131	\$ 1,480
2022		38,428	1,349
2023		32,039	1,197
2024		28,411	1,100
2025		22,168	1,057
Thereafter		70,046	21,099
Total lease payments		234,223	27,282
Less: amounts representing interest		(19,869)	(9,436)
Total obligation	\$	214,354	\$ 17,846

AUGUST 31, 2020 AND 2019

Supplemental cash flow information related to leases for the year ended August 31 is as follows (in thousands):

	2020
Other information	
Cash paid for amounts included in the measurement of lease liabilities	
Operating cash flows from operating leases	\$ 41,811
Operating cash flows from finance leases	3,523
Financing cash flows from finance leases	4,087
Right-of-use assets obtained in exchange for lease obligations	
Operating leases	15,253
Finance leases	311
Weighted-average remaining lease term finance lease	24 years
Weighted-average remaining lease term operating lease	8 years
Weighted-average discount rate finance lease	3.82%
Weighted-average discount rate operating lease	2.00%

Given the transition adoption method elected by the University, future aggregate minimum payments under noncancelable operating and capital leases for the years ended August 31, under ASC Topic 840 are as follows (in thousands):

	Opera	nting Leases	Capital Leases		
2020	\$	41,957	\$ 2,179		
2021		33,224	2,081		
2022		29,760	1,924

Total bonds and notes payable			\$ 2,562,915	\$ 1,980,060

⁽¹⁾ Various bonds were refunded with proceeds from the University's issuance of 2020 Series A and 2020 Series B bonds.

²⁰¹³ Series B bonds are floating rate notes and the interest rate is based on a spread to The Securities Industry and Financial Markets Association Index (SIFMA).

AUGUST 31, 2020 AND 2019

The University incurred interest expense of \$72.2 million and \$83.5 million in 2020 and 2019, respectively, net of capitalized interest of \$1.5 million and \$0.0 million in 2020 and 2019, respectively.

As of August 31, 2020, the aggregate annual maturities of bonds and notes payable for the next five years and thereafter are as follows (in thousands):

	2020
PAYABLE IN FISCAL YEAR:	
2021	\$ 16,769
2022	11,536
2023	11,345
2024	11,450
2025	19,305
Thereafter	2,268,300
	2,338,705
Unamortized net premium	233,401
Unamortized net bond issuance costs	(9,191)
	\$ 2,562,915

During 2020, the University refunded its 1994 Series B bonds, 1995 Series B bonds, 1999 Series B bonds, 2011 Series A bonds, and a portion of the 2005 Series B bonds and 2008 taxable Commercial Paper program totaling \$332.6 million with proceeds from the University's issuance of 2020 Series A bonds. Additionally, the University funded \$600.0 million for general corporate purposes with proceeds from the University's issuance of the 2020 Series A bonds. The University also refunded its 2005 Series C bonds, 2013 Series C bonds, 2010 tax-exempt Commercial Paper program, and a portion of the 2005 Series B bonds and 2008 taxable Commercial Paper program totaling \$603.2 million with proceeds from the 2020 Series B bonds. The University recognized a net accounting gain of \$4.4 million in conjunction with issuance of the 2020 Series A and 2020 Series B bonds, which is included in nonoperating activities, net in the accompanying 2020 consolidated statement of activities.

On August 18, 2010, the University established a \$400.0 million tax-exempt Commercial Paper program and issued the final

program order of \$164.4 million in September 2018. During 2020, the outstanding commercial paper was refunded as part of the 2020 Series B bonds issuance. The University cannot issue additional commercial paper under the 2010 tax-exempt Commercial Paper program.

In 2008, the University established a \$100.0 million taxable Commercial Paper program. The taxable Commercial Paper program was increased to \$150.0 million in 2014 and to \$350.0 million in 2019. As of August 31, 2020 and 2019, the University has an outstanding balance of \$0.0 million and \$203.2 million, respectively, under this program.

The University has a standby credit facility to enable the University to purchase tendered variable rate debt in the event of a failed remarketing. Currently, it has one diversified facility totaling \$175.0 million that is committed for this sole purpose and cannot be used for operating needs of the University. There were no draws against this line of credit in 2020 or 2019.

Emory Healthcare entered into an affiliation agreement with one of its payors effective June 11, 2018, which was renewed in June 2020. This affiliation agreement includes, among other provisions, a \$100.0 million line of credit to Emory University, which can be utilized for any purpose that advances the charitable mission of Emory Healthcare. The affiliation agreement and related line of credit expire on September 1, 2021. There is no outstanding balance on this line of credit as of August 31, 2020 or 2019. The University has an additional \$725.0 million of lines credit with three commercial banks for which there is also no outstanding balance as of August 31, 2020. The three lines of credit mature in March and April 2021.

The University has two letters of credit with a commercial bank totaling \$1.3 million. There were no outstanding balances as of August 31, 2020 or 2019. The letter of credit agreements have varying expiration dates through fiscal year 2021.

The terms of the University's long-term debt provide for certain financial and nonfinancial covenants, including provisions as to the use of the proceeds, limits as to arbitrage and bond issuance costs, and various other administrative requirements.

AUGUST 31, 2020 AND 2019

(17) Net Assets

The following is a summary of net assets as of August 31 (in thousands):

		2020			2019	
	Without Donor Restrictions	With Donor Restrictions	Total	Without Donor Restrictions	With Donor Restrictions	Total

	\$ 4,459,502	6,158,375	10,617,877	\$ 4,299,283	5,814,741	10,114,024

(18) Retirement and Deferred Compensation Plans

The University has a defined-contribution plan under the Code, Section 403(b), covering eligible employees. The University contributes an amount equal to 6% of each eligible employee's compensation to the plan as well as a supplemental contribution of 3% based on a 1.5 to 1 match of employee contributions of up to 2% of compensation. Emory Healthcare sponsors a retirement plan, covering most full-time employees, under which annuities are purchased with contributions made by Emory Healthcare and its employees. The benefits are vested only to the extent of the annuities purchased. TEC sponsors The Emory Clinic, Inc. Retirement Savings Plan (the Retirement Plan), covering all its employees, except those considered leased employees or those covered under collective bargaining agreements, as defined. The Retirement Plan provides for employees to make salary reduction contributions and for TEC to make discretionary contributions for employees who have attained the age of 21 and are employees at the date the contribution is made. The Retirement Plan provides for contributions at an annual determined percentage of compensation and employees cliff vest in employer contributions after three years of service. Retirement expense totaled \$154.9 million and \$154.8 million during 2020 and 2019, respectively, and is included in fringe benefits expense in the accompanying consolidated statements of activities.

The University sponsors the Code Section 457(b) Deferred Compensation Plan primarily for the purpose of providing deferred compensation for a select group of management or highly compensated employees who are eligible for participation and elect to make salary deferrals under the Deferred Compensation Plan. These assets are fully vested and available to the participating employees at the time of termination of

employment from the University. As of August 31, 2020 and 2019, respectively, the University held other assets of \$170.5 million and \$142.0 million under the Retirement Plan. These assets are included in other assets, which are designated by the University to pay future salary deferral plan payments. The assets are held in separate investment funds for which the majority are classified as Level 1 in the fair value hierarchy. Associated liabilities for the obligations of \$170.5 million and \$142.0 million as of August 31, 2020 and 2019, respectively, are included in accrued liabilities for benefit obligations and professional liabilities and considered Level 2 in the fair value hierarchy.

(19) Pension Plans – Emory Healthcare

Emory Healthcare sponsors a defined-benefit pension plan (the Plan). The Plan was curtailed effective December 31, 2011. The terms of the curtailment generally provide that no further benefit accrual under the Plan is provided for service after the effective date nor will new entrants into the Plan be permitted after the effective date.

The Plan's investment objectives are to protect long-term asset value by applying prudent, low-risk, high-quality investment disciplines and to enhance the values by maximizing investment returns through active security management within the framework of the Plan's investment policy. Asset allocation strategies and investment management structure are designed to meet the Plan's investment objectives.

AUGUST 31, 2020 AND 2019

The Plan's expected long-term rate of return on assets is determined by reviewing the historical return of each asset category comprising the Plan's target asset allocation.

The Joint Operating Company (JOC) assumed certain definedbenefit pension liabilities covering certain employees of the entities contributed to the JOC by Saint Joseph's Health System SJHS (the SJHS Pension Plan). The plan was curtailed, effective December 31, 2011, and the JOC has agreed to provide for funding of the plan, generally over 10 years, beginning in fiscal year 2015, subject to certain terms and conditions. In connection with the acquisition of DRHS, Emory Healthcare assumed sponsorship of DRHS' trusteed noncontributory, defined-benefit pension plan on September 1, 2018. Prior to the acquisition, the DRHS Pension Plan had been permanently frozen effective December 31, 2008 as a result of DRHS' Board of Directors approving such action.

Given the curtailment of the plans, the accumulated benefit obligations at August 31, 2020 and 2019 are the same as the projected benefit obligations.

The changes in the projected benefit obligations as of and for the years ended August 31 are as follows (in thousands):

		2020 2019						
	I	Emory Healthcare	SJHS	DRHS	I	Emory Healthcare	SJHS	DRHS
Projected benefit obligation, beginning of year	\$	341,188	176,513	64,408	\$	320,034	149,118	161,598

Benefits paid		(7,282)	(6,461)	(261)		(9,127)	(5,906)	(8,283)
Projected benefit obligation, end of year	\$	430,110	180,725	_	\$	341,188	176,513	64,408

As a result of the acquisition of DRHS, the funded status of the DRHS Pension Plan was remeasured as of September 1, 2018, and unamortized prior service costs and experience gains and losses were eliminated.

On December 31, 2019, the DRHS pension plan was merged into the Emory Healthcare Plan. Liabilities and assets were remeasured as of the date of the merger. The result was a liability transfer of \$61.5 million, an asset transfer of \$60.0 million, and a transfer of unrecognized net loss of \$6.0 million for the plan combination.

The changes in the fair value of plan assets, funded status of the plans, and the status of amounts recognized in the accompanying consolidated statements of financial position as of and for the years ended August 31 are as follows (in thousands):

	2020 2019						
	Emory Healthcare	SJHS	DRHS		Emory Healthcare	SJHS	DRHS
Fair Value of plan assets, beginning of year	\$ 228,046	127,001	62,160	\$	251,372	121,388	165,400
Actual return on plan assets	36,490	17,134	(1,924)		16,226	5,153	17,810
Employer contributions	2,500	6,414	_		10,516	6,366	-

Fair value of plan assets, end of year	\$ 319,729	144,088	_	\$	228,046	127,001	62,160
Funded status - accrued pension cost recognized in the consolidated statements of financial position	\$ (110,381)	(36,637)	-	\$	(113,142)	(49,512)	(2,248)

AUGUST 31, 2020 AND 2019

The components of net periodic pension cost for the years ended August 31 are as follows (in thousands):

			2020		2019				
	Em	ory Healthcare	SJHS	DRHS	Em	ory Healthcare	SJHS	DRHS	
Interest cost	\$	11,106	5,335	628	\$	12,582	6,250	5,695	
Expected return on assets		(12,065)	(8,567)	(621)		(17,077)	(8,200)	(7,035)	
Amortization of prior service cost		=	(438)	-		=	(438)	-	
Settlement loss recognized		=	=	-		15,549	=	5,731	
Amortization of net loss		=	=	91		=	=	4	
Recognized actuarial loss		2,832	2,654	-		1,947	1,679		
Net periodic pension cost	\$	1,873	(1,016)	98	\$	13,001	(709)	4,395	

Net periodic pension costs are recognized as employees render the services necessary to earn the pension and postretirement benefits.

Weighted average assumptions used to determine benefit obligations in the accompanying consolidated statements of financial position as of August 31 are as follows:

	2020			2019		
	Emory Healthcare	SJHS	DRHS	Emory Healthcare	SJHS	DRHS
Discount rate	2.78%	2.71%	%	3.11%	3.08%	3.14%
Expected long-term rate of return on plan assets	4.65	6.75	_	6.80	6.75	4.81

Weighted average assumptions used to determine net periodic pension cost for the years ended August 31 are as follows:

	2020			2017		
	Emory Healthcare	SJHS	DRHS	Emory Healthcare	SJHS	DRHS
Discount rate	3.11%	3.08%	3.14%	4.31%	4.28%	4.24%
Expected long-term rate of return on plan assets	4.65	6.75	3.50	6.80	6.75	4.81

The following tables summarize the plan assets, which are recorded at fair value as of August 31 as follows (in thousands):

						202	0		
	Emory					Fair Value Hierarchy		Total	Target ₍₁₎

(1) While each plan has an individual target asset allocation, the percentage represents the averages for all plans assets.

Cash Flows

Emory Healthcare expects to contribute \$11.8 million to the Emory Healthcare Pension Plan, and \$7.4 million to the SJHS Pension Plan during fiscal year 2021.

Expected Future Benefit Payments

Emory Healthcare annual future benefit payments, excluding lump-sum settlements, are expected to range from \$10.4 million to \$16.3 million for the next five years. SJHS Pension Plan annual future benefit payments, excluding lump-sum settlements, are expected to range from \$7.0 million to \$8.3 million for the next five years.

Other Items

Emory Healthcare uses the straight-line method to amortize prior service cost for both plans.

(20) Postretirement Healthcare and Life Insurance Benefits

The University sponsors a postretirement life insurance and healthcare benefits plan. Participants hired after 2002 pay the full retiree-specific premium equivalent and are therefore assumed to pay the full cost of their coverage. The University and Emory Healthcare each fund a separate trust (VEBA Trust) for retiree health and life benefits. The assets of the VEBA Trust are invested primarily in equity and fixed-income securities. The University funds these benefits only to the extent of current retiree claims. The University measures its participation in the VEBA Trust at August 31 each fiscal year.

The changes in the accumulated postretirement benefit obligation (APBO) as of August 31 are as follows (in thousands):

			2020		2	2019
	Er	Emory University Emory Healthcare		Total		Total
APBO, beginning of year	\$	128,681	72,054	200,735	\$	160,648
Service cost		1,926	684	2,610		2,112
Interest cost		3,635	1,998	5,633		6,456
Actuarial losses (gains)		6,391	(129)	6,262		37,039
Benefits paid		(3,898)	(1,763)	(5,661)		(5,520)
APBO, end of year	\$	136,735	72,844	209,579	\$	200,735

Discount rate to determine APBO as of August 31, 2020 and 2019 was 2.80% and 3.12%, respectively.

AUGUST 31, 2020 AND 2019

The changes in the fair value of plan assets, funded status of the plan, and the status of the accrued postretirement benefit obligation recognized in the accompanying consolidated statements of financial position as of and for the years ended August 31 are as follows (in thousands):

		2020		2019
	Emory University	Emory Healthcare	Total	Total
Fair value of plan assets, beginning of year	\$ 73,080	17,450	90,530	\$ 93,040
Actual return on plan assets	7,605	1,411	9,016	(459)
Benefits paid from plan assets	=	(1,763)	(1,763)	(2,051)
Fair value of plan assets, end of year	\$ 80,685	17,098	97,783	\$ 90,530
Funded status – accrued postretirement benefit cost recognized in the consolidated statements of financial position	\$ (56,050)	(55,746)	(111,796)	\$ (110,205)

The components of net periodic postretirement benefit cost for the years ended August 31 are as follows (in thousands):

	2020			2019		
		Emory University	Emory Healthcare	Total		Total
Service cost of benefits earned	\$	1,926	684	2,610	\$	2,112
Interest cost on APBO		3,635	1,998	5,633		6,456
Expected return on plan assets		(5,116)	(1,134)	(6,250)		(7,223)
Recognized net actuarial loss		3,642	3,740	7,382		3,945
Net periodic postretirement benefit cost	\$	4,087	5,288	9,375	\$	5,290

Discount rate and expected return on plan assets used to determine net periodic postretirement benefit cost for the years ended August 31, 2020 and 2019 was 3.12% and 4.32%, respectively, and 7.00% and 8.00%, respectively.

The amounts accumulated in net assets without donor restrictions follow as of August 31 (in thousands):

	2020			2019		
	Emory University	Emory Healthcare	Total		Total	
Net unrecognized actuarial loss	\$ 67,806	29,503	97,309	\$	101,207	
Prior service cost	(86)	_	(86)		(98)	
Total	\$ 67,720	29,503	97,223	\$	101,109	

In fiscal year 2021, net unrecognized actuarial losses of \$3.6 million for Emory University and \$3.7 million for Emory Healthcare are expected to be amortized from net assets without donor restrictions into net periodic postretirement benefit cost.

Plan Assets

The Investment Committee of Emory University's Board of Trustees approves the investment guidelines and asset allocation targets for the pension benefits and postretirement benefits plans. The primary objective of the investments is to ensure the solvency of the plans over time to meet plan obligations. The secondary objective is to meet or exceed the plans' actuarial assumed rate of return over time without taking excess risk. The funds are diversified by asset class in accordance with established allocation targets and rebalanced as needed. Specific investments are apportioned to a combination of institutional pooled funds and mutual funds.

AUGUST 31, 2020 AND 2019

The following table summarizes the VEBA Trust assets for the University and Emory Healthcare as of August 31 (in thousands):

		Fair Value I	Fair Value Hierarchy		Target	Total Asset
	Total Fair Value	Level 1	Level 2	NAV	Allocation	Allocation
Fixed income	\$ 20,924	13,998	6,926	_	25%	21%

Total investments	\$	90,530	30,375	46,272	13,883	100%	100%	

Cash Flows

Emory University and Emory Healthcare expect to contribute \$4.2 million and \$2.5 million, respectively, to the postretirement benefit plan during fiscal year 2021.

Expected Future Benefit Payments

Annual future benefit payments are expected to range from \$4.2 million to \$5.3 million for Emory University and from \$2.5 million to \$3.2 million for Emory Healthcare for the next five years.

(21) Functional Expenses

The consolidated statements of activities present expenses by

natural classification. The University also summarizes expenses by functional classification, in accordance with its mission. The University's primary program services are instruction, research, public service, and the delivery of healthcare and medical services. Expenses for academic support, institutional support, and independent operations/auxiliary enterprises are generally incurred in support of these primary program activities, with academic support being related to student financial aid. Capital and plant expenditures, costs for operation and maintenance of plant, interest on indebtedness, and depreciation and amortization are allocated using a variety of cost allocation techniques, such as square footage and time and effort.

The consolidated statements of activities include the following functional expenses for the years ended August 31 (in thousands, net of the cost allocations and recharges referenced above):

2020

		Instruction	Research	Academic Support and Scholarship and Fellowship	Institutional Support	Public Service	*Healthcare and Medical Services	Independent Operations and Auxiliary	Total
Salaries	\$	310,588	250,500	90,830	161,045	55,504	2,398,787	99,878	3,367,132
Fringe benefits		74,597	62,373	22,334	20,294	14,054	499,813	20,758	714,223
Student financial aid		_	-	27,302	-	-	_	_	27,302
Nonsalary operating expenses		55,590	198,984	56,377	4,898	42,579	1,715,070	27,361	2,100,859
Interest on indebtedness		7,046	11,216	4,479	2,261	1,771	27,072	18,919	72,764
Depreciation and amortization		29,537	49,476	17,832	25,563	8,130	155,687	17,120	303,345

Depreciation and amortization	28,572	47,885	17,249	24,726	7,864	151,080	16,915	294,291
Total expenses	\$ 450,305	540,070	208,870	225,623	128,715	4,605,923	155,020	6,314,527

^{*} Healthcare and Medical Services - The portion of patient care services related to Emory Healthcare expense is \$4.3 billion. Healthcare administrative costs are \$396.7 million, included therein.

Costs related to the University's operation and maintenance of property, including depreciation of property and equipment and interest on related debt, are allocated to program and supporting activities based upon information reported in the space study and debt financing records. Total amounts allocated in 2020 and 2019 were \$175.8 million and \$175.6 million, respectively. Fundraising costs were approximately \$40.0 million and \$43.0 million in 2020 and 2019, respectively.

(22) Medical Professional and General Liability Insurance Coverage

CCIC, Emory Healthcare's wholly owned offshore captive insurer, provides claims-made primary medical professional and general liability coverage for the University, the Hospitals, Emory Clinic, Emory Specialty Associates, and Wesley Woods Center.

As of August 31, 2020 and 2019, the University has recorded an accrual for estimated losses associated with all retained CCIC risks of approximately \$262.1 million (discounted 2.5%) and \$203.8 million (discounted at 2.5%), respectively.

Emory has purchased layered excess and umbrella insurance and reinsurance coverage beyond the amounts retained by CCIC, through various carriers, for a total of \$105.0 million per claim and in the aggregate.

The estimated liability for professional and general liability claims will be significantly affected if current and future claims differ from historical trends. While the University monitors reported claims closely and considers potential outcomes as estimated by its actuaries when determining its professional and general liability accruals, the complexity of the claims, the extended period of time to settle the claims, and the wide range of potential outcomes complicate the estimation. The

University's management believes adequate provision has been made for the related risk.

(23) Related-Party Transactions

The Carter Center, Inc. (CCI) is a nonprofit organization founded by former U.S. President Jimmy Carter and Rosalynn Carter, which sponsors various domestic and international programs. The Board of Trustees of CCI comprises 16 to 28 members, including its founders, and others as elected half by the University, including the University's president, and half by the Carter Center class trustees. The University's Board of Trustees has the authority to approve amendments to CCI's articles of incorporation and bylaws. Funds held in trust for others include \$866.1 million and \$780.2 million, representing CCI's investment in the University's long-term investment portfolio as of August 31, 2020 and 2019, respectively.

Emory University and Children's Healthcare of Atlanta, Inc. (Children's), a Georgia nonprofit corporation, established the Emory + Children's Pediatric Institute (the Institute) effective September 1, 2018 under a Master Affiliation Agreement (the affiliation agreement). Under the terms of the affiliation agreement, approximately 350 Emory University School of Medicine Department of Pediatrics faculty physicians and PhD researchers transferred to the Institute and became employees thereof. The affiliation agreement restructured previous arrangements between the parties for pediatric teaching, research, and related clinical services. The ownership of the Institute is 50% Emory University and 50% Children's, with equal representation on the governing board. The funding obligations of each party are specified by the affiliation agreement, and each party funds its mission-related expenses. The University reports research and teaching expenses provided by these 350 faculty members in salaries, fringe benefits, professional fees and

AUGUST 31, 2020 AND 2019

purchased services, and other operating expenses in the consolidated statements of activities.

(24) Commitments and Contingencies

Emory University and Emory Healthcare are in the process of constructing, renovating, and equipping certain facilities for which the outstanding commitments at August 31, 2020 totaled \$280.6 million and \$377.0 million, respectively.

Expenditures and indirect costs related to federal and state grants and contracts are subject to adjustment based upon review by the granting agencies. The amounts, if any, of expenditures which may be disallowed by the granting agencies, cannot be determined at this time, although management expects they will not have a material effect on the University's consolidated financial statements.

Lawsuits and claims have been filed against the University in the ordinary course of business. As one of the nation's largest research universities and academic medical centers, the University has active litigation that takes several forms. The University's policy is to accrue for litigation and claims when such amounts are probable and can be reasonably estimated based on consultation with external legal counsel and Emory General Counsel review.

In addition, the University is subject to many federal and state regulations, and as a result, there may be one or more pending government investigations ongoing at any time. While the outcome of many of these actions is not presently determinable, it is the opinion of management that any resulting liability from these actions will not have a material adverse effect on the consolidated statements of financial position or operating results of the University. The University also has a comprehensive program of primary and excess insurance. Management of the University believes any current pending lawsuit subjecting the University to liability would not have a materially adverse effect on the University's consolidated statements of financial position.

Emory Healthcare and SJHS have a JOC under the name of Emory/Saint Joseph's, Inc. to further the respective missions of Emory Healthcare and CHE Trinity Health. Under the JOC Contribution Agreement, Emory Healthcare maintains a 51% controlling ownership interest in the JOC. SJHS has a noncontrolling membership interest in the JOC of 49%. Effective August 31, 2014, CHE Trinity Health has a put right, as defined in the JOC Contribution Agreement, that may be exercised at any time with written notice to Emory Healthcare. Upon the occurrence of such event, Emory Healthcare may be required to purchase from SJHS its noncontrolling interest in the JOC.

As part of the terms of the Definitive Agreement to acquire DRHS, Emory Healthcare committed \$239.0 million on capital projects to benefit DRHS and its affiliates over a 7-year period, beginning September 1, 2018. Such period may be extended under certain circumstances to a period of no more than 10 years.

(25) Subsequent Events

Emory has evaluated subsequent events after the consolidated statements of financial position date of August 31, 2019 through December 18, 2020, the date the consolidated financial statements were available to be issued, and noted that there are no other items to disclose.

Independent Auditors' Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance With Government Auditing Standards

The Board of Trustees Emory University:

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, the consolidated financial statements of Emory University and its subsidiaries (the University), which comprise the consolidated statement of financial position as of August 31, 2020, and the related consolidated statements of activities and cash flows for the year then ended, and the related notes to the consolidated financial statements, and have issued our report thereon dated December 18, 2020. Our report contains an emphasis of matters paragraph referring to the University's adoption, in fiscal year 2020, of Accounting Standards Update (ASU) No. 2016-18, *Statement of Cash Flows (Topic 230): Restricted Cash*, and ASU No. 2016-02, *Leases (Topic 842*), as amended.

Internal Control Over Financial Reporting

In planning and performing our audit of the consolidated financial statements, we considered the University's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the consolidated financial statements, but not for the purpose of expressing an opinion on the effectiveness of the University's internal control. Accordingly, we do not express an opinion on the effectiveness of the University's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the University's consolidated financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the consolidated financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the University's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the University's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Notes to Supplementary Schedules of Expenditures of Federal Awards and Cash Receipts and Expenditures of State of Georgia Awards

Year ended August 31, 2020

(1) Summary of Significant Accounting Policies

The accompanying supplementary schedule of expenditures of federal awards (the Schedule) includes the federal grant activity of Emory University and its subsidiaries (the University) and is presented on the accrual basis of accounting. The Schedule presents all grants, contracts, and similar agreements entered into directly between agencies and departments of the federal government and subawards to the University from nonfederal organizations pursuant to federal grants, contracts, and similar agreements. The Schedule also presents awards passed through from the University to other nonfederal subrecipient organizations. The information in the Schedule is presented in accordance with the requirements of Title 2 U.S. Code of Federal Regulations Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Therefore, some amounts presented in the Schedule may differ from amounts presented in, or used in the preparation of, the consolidated financial statements.

The accompanying supplementary schedule of cash receipts and expenditures of State of Georgia awards includes expenditures incurred (i.e., on an accrual basis) by the University and grant revenues received from State of Georgia agencies under various state contracts.

Negative balances represent programs with unfunded expenditures prior to normal closeout procedures, which were subsequently transferred to unrestricted cost centers.

(2) Basis of Accounting

Expenditures for federal student financial assistance programs are recognized as incurred and include grants to students under the Federal Pell Grant and Federal Supplemental Educational Opportunity Grant Programs, student earnings under the Federal Work Study Program, and administrative cost allowances, where applicable. Expenditures for loans related to the Federal Direct Student Loan Programs (FDSLP) are reported in the Schedule when disbursed.

New loans made during the fiscal year and loans from previous fiscal years for which the University has continuing compliance requirements to adhere to related to the Federal Perkins Loan Program are reported in the Schedule. Expenditures for other federal awards are recognized as incurred using the cost accounting principles contained in Uniform Guidance. Under these cost principles, certain types of expenses are not allowable or are limited as to reimbursement.

COVID-19 Claims Reimbursement to Health Care Providers and Facilities for Testing, Treatment, and Vaccine Administration for the Uninsured (CFDA 93.461) includes reimbursements for health care services rendered through August 31, 2020.

(3) Federal Loan Programs

Most federal financial assistance is in the form of cash awards. However, there are a number of federal programs that do not involve cash transactions with the University. These noncash transactions in which the University obtains other assistance are the FDSLP and revolving loan programs, such as the Federal Perkins Loan Program.

Notes to Supplementary Schedules of Expenditures of Federal Awards and Cash Receipts and Expenditures of State of Georgia Awards

Year ended August 31, 2020

The loans advanced and related expenditures are as follows for the various student loan programs:

	CFDA number		Amount	
Federal Direct Student Loan Programs: Student loans advanced:				
Subsidized Stafford Loan Program Unsubsidized Stafford Loan Program	84.268 84.268	\$_	8,492,064 70,577,346	
Total Direct Stafford Loan Program			79,069,410	
Federal Direct PLUS Loan Program	84.268	_	45,345,792	
Total Federal Direct Student Loan Programs		\$_	124,415,202	

The Federal Perkins Loan Program is administered directly by the University, and balances and transactions relating to this program are included in the University's consolidated financial statements. The amount presented on the Schedule represents the Federal Perkins Loans outstanding as of August 31, 2019. Federal Perkins Loans outstanding at August 31, 2020 totaled \$5,653,185. No new loans were awarded or disbursed during the year ended August 31, 2020.

The University is responsible for the performance of certain administrative duties with respect to the FDSLP. It is not practicable to determine the balance of loans outstanding to students and former students of the University under this program as of August 31, 2020. These loans are not included in the University's consolidated financial statements.

(4) Matching

Under the Federal Supplemental Educational Opportunity Grant Program, the University matched \$391,793 in funds awarded to students for the year ended August 31, 2020 in addition to the federal share of expenditures included in the Schedule.

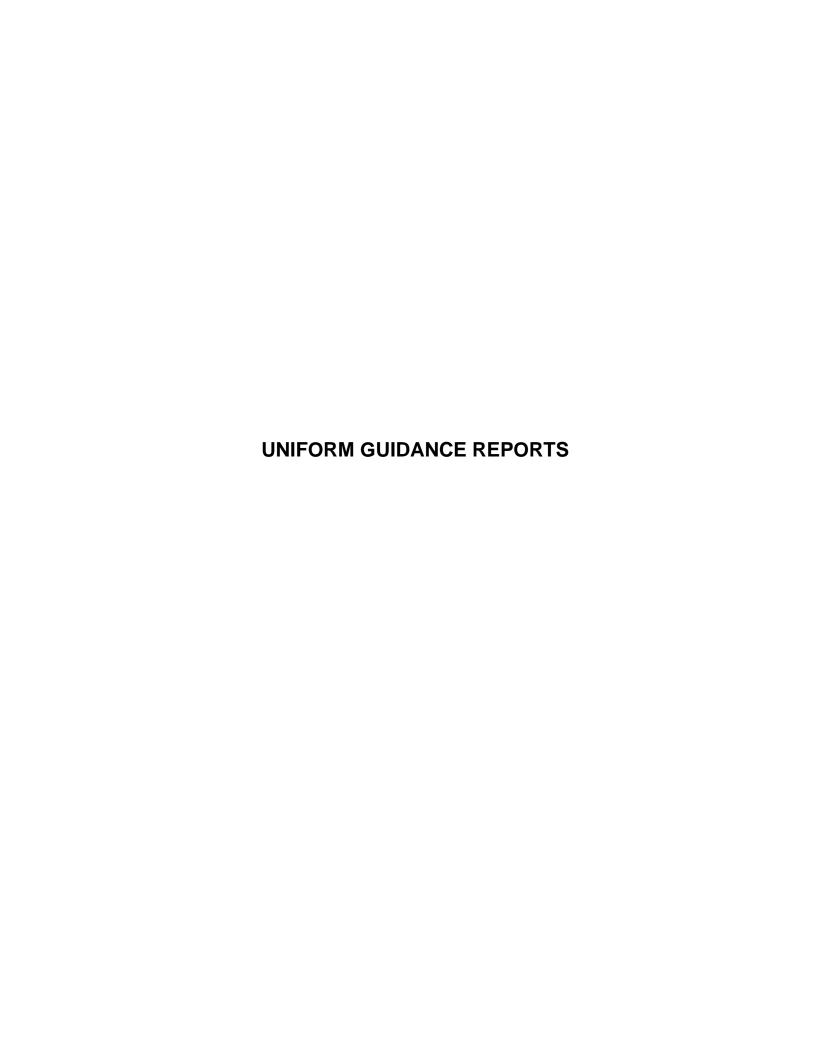

Under the Federal Work Study Program, the University matched \$737,145 in total compensation to students for the year ended August 31, 2020 in addition to the federal share of expenditures included in the Schedule.

(5) Administrative Cost Allowance

The University recorded an administrative cost allowance of \$72,125 for the year ended August 31, 2020. This amount is included in the Schedule as federal expenditures under the Federal Work Study Program.

(6) Indirect Costs

For the year ended August 31, 2020, the University did not elect to use the 10% de minimis indirect cost rate permitted by the Uniform Guidance.

KPMG LLP Suite 2000 303 Peachtree Street, N.E. Atlanta, GA 30308-3210

Independent Auditors' Report on Compliance For Each Major Federal Program; Report on Internal Control Over Compliance; and Report on Supplementary Schedules of Expenditures of Federal Awards Required by the Uniform Guidance and Cash

Receipts and Expenditures of State of Georgia Awards

The Board of Trustees Emory University:

Report on Compliance for Each Major Federal Program

We have audited Emory University's (the University) compliance with the types of compliance requirements described in the *OMB Compliance Supplement* that could have a direct and material effect on each of the University's major federal programs for the year ended August 31, 2020. The University's major federal programs are identified in the summary of auditors' results section of the accompanying schedule of findings and questioned costs.

Management's Responsibility

Management is responsible for compliance with federal statutes, regulations, and the terms and conditions of its federal awards applicable to its federal programs.

Auditors' Responsibility

Our responsibility is to express an opinion on compliance for the University's major federal programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the audit requirements of the Title 2 U.S. Code of Federal Regulations Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Those standards and the Uniform Guidance require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about Emory University's compliance with those requirements and performing such other procedures as we consider necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for the University's major federal programs. However, our audit does not provide a legal determination of the University's compliance.

Opinion on Each Major Federal Program

In our opinion, Emory University complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the year ended August 31, 2020.

Report on Internal Control Over Compliance

Management of Emory University is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered the University's internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program to determine the auditing

procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the University's internal control over compliance.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A material weakness in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

Report on Supplementary Schedules of Expenditures of Federal Awards Required by the Uniform Guidance and Cash Receipts and Expenditures of State of Georgia Awards

We have audited the consolidated financial statements of Emory University and subsidiaries as of and for the year ended August 31, 2020, and have issued our report thereon dated December 18, 2020, which contained an unmodified opinion on those consolidated financial statements. Our audit was conducted for the purpose of forming an opinion on the consolidated financial statements as a whole. The accompanying supplementary schedules of expenditures of federal awards and cash receipts and expenditures of State of Georgia awards are presented for purposes of additional analysis as required by the Uniform Guidance and the State of Georgia, respectively, and are not a required part of the consolidated financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the consolidated financial statements. The information has been subjected to the auditing procedures applied in the audit of the consolidated financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the consolidated financial statements or to the consolidated financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supplementary schedules of expenditures of federal awards and cash receipts and expenditures of State of Georgia awards are fairly stated, in all material respects, in relation to the consolidated financial statements as a whole.

Atlanta, Georgia July 22, 2021

Schedule of Findings and Questioned Costs Year ended August 31, 2020

(1) Summary of Auditors' Results

- (a) The type of auditors' report issued on whether the consolidated financial statements were prepared in accordance with U.S. generally accepted accounting principles: **Unmodified**
- (b) Internal control deficiencies over financial reporting disclosed by the audit of the consolidated financial statements:
 - Material weaknesses: No
 - Significant deficiencies: None reported
- (c) Noncompliance material to the consolidated financial statements: No
- (d) Internal control deficiencies over major program disclosed by the audit:
 - Material weaknesses: No
 - Significant deficiencies: None reported
- (e) Type of auditors' report issued on compliance for major programs: Unmodified
- (f) Any audit findings, which are required to be reported under Section 2 CFR 200.516(a) of Uniform Guidance: **No**
- (g) Major programs:
 - Research and Development cluster various CFDA numbers
 - COVID-19 Claims Reimbursement to Health Care Providers and Facilities for Testing, Treatment, and Vaccine Administration for the Uninsured CFDA number 93.461
- (h) Dollar threshold used to distinguish between Type A and Type B programs: \$3,000,000
- (i) Auditee qualified as a low-risk auditee: Yes
- (2) Findings Relating to the Consolidated Financial Statements Reported in Accordance with Government Auditing Standards

None

(3) Findings and Questioned Costs Relating to Federal Awards

None
